**The Hero's Body: A Memoir** Feb 10 2022 A memoir of motorcycles and muscles, of obsession and grief, and of a young man who learned how to stay alive through literature. At just forty-seven years old, William Giraldi's father was killed in a horrific motorcycle crash while racing on a country road. This tragedy, which forever altered the young Giraldi and devastated his family, provides the pulse for The Hero's Body. In the tradition of Andre Dubus III's Townie, this is a deep-seeing investigation into two generations of men from

the working-class town of Manville, New Jersey, including Giraldi's own forays into obsessive bodybuilding as a teenager desperate to be worthy of his family's pitiless, exacting codes of manhood. Lauded by *The New Yorker* for his "unrelenting, perfectly paced prose," Giraldi writes here with daring, searing honesty about the fragility and might of the American male. An unflinching memoir of luminous sorrow, a son's tale of a lost father and the ancient family strictures of extreme masculinity, *The Hero's Body* is a work of lasting beauty by one of our most fearless writers.

**Riding in the Zone** Feb 27 2021 Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.

Text comprises the state-of-the-art developments in the field of two wheelers. Detailed explanation on the actual assemblies helps the students to cognize the technology systematically. Although the emphasis has been given to the two wheeler technology, considering the requirement of various syllabi, the last chapter is solely dedicated to three wheeler technology. Chapter-end review questions help students in preparing them for examination by self-assessment method. Primarily designed for the undergraduate and diploma students of automobile engineering, the lucid and simple presentation of the book makes it useful for the commoner, who has keen interest in this area.
