Mirage Jan 02 2021 When a high-profile Russian prisoner warns of a deadly weapon designed by one of America's greatest inventors, Juan Cabrillo and the Oregon crew must race to uncover the truth in this adventure in the #1 New York Times–bestselling series. In October 1943, a U.S. destroyer sailed out of Philadelphia and supposedly vanished, the result of a Navy experiment with electromagnetic radiation. The story was considered a hoax—but now Juan Cabrillo and his Oregon colleagues aren't so sure. There is talk of a new weapon soon to be auctioned, something very dangerous to America's interests, and the rumors link it to the great inventor Nikola Tesla, who was working with the Navy when he died in 1943. Was he responsible for the experiment? Are his notes in the hands of enemies? As Cabrillo races to find the truth, he discovers there is even more at stake than he could have imagined—but by the time he realizes it, he may already be too late.

The Revival of the 2-stroke Engine and Studying Flex Fuel Engines Oct 23 2022 This collection is a resource for studying the history of the evolving technologies that have contributed to snowmobiles becoming cleaner and quieter machines. Papers address design for a snowmobile using the EPA test procedure and standard for off-road vehicles. Innovative technology solutions include: • Engine Design: improving the two-stroke, gas direct injection (GDI) engine • Applications of new muffler designs and a catalytic converter • Solving flex-fuel design and engine power problems The SAE International Clean Snowmobile Challenge (CSC) program is an engineering design competition. The program provides undergraduate and graduate students the opportunity to enhance their engineering design and project management skills by reengineering a

snowmobile to reduce emissions and noise. The competition includes internal combustion engine categories that address both gasoline and diesel, as well as the zero emissions category in which range and draw bar performance are measured. The goal of the competition is designing a cleaner and quieter snowmobile. The competitors' modified snowmobiles are also expected to be cost-effective and comfortable for the operator to drive.

Living Walden Two Apr 24 2020 In *Walden Two*, behavioral psychologist B. F. Skinner describes one of the most controversial fictional utopias of the twentieth century. During the 1960s and 70s, this novel went on to inspire approximately three dozen actual communities, which are entertainingly examined in Hilke Kuhlmann's *Living Walden Two*. In the novel, behavioral engineers use positive reinforcement in organizing and "gently guiding" all aspects of society, leaving the rest of the citizens "free" to lead happy and carefree lives. Among the real-world communities, a recurrent problem in moving past the planning stages was the nearly ubiquitous desire among members to be gentle guides, coupled with strong resistance to being guided. In an insightful and often hilarious narrative, Hilke Kuhlmann explores the dynamics of the communities, with an in-depth examination of the two surviving Skinnerian communities: *Comunidad Los Horcones* in Mexico, and *Twin Oaks* in Virginia. Drawing on extensive interviews with the founders and key players in the *Walden Two* communities, Kuhlmann redefines the criteria for their success by focusing on the tension between utopian blueprints for a new society and communal experiments' actual effects on individual lives.

From the Folks Who Brought You the Weekend Feb 03 2021 Newly updated: "An enjoyable introduction to American working-class history." —The *American Prospect* Praised for its "impressive even-handedness", *From the Folks Who Brought You the Weekend* has set the standard for viewing American history through the prism of working people (Publishers Weekly, starred review). From indentured servants and slaves in seventeenth-century Chesapeake to high-tech workers in contemporary Silicon Valley, the book "[puts] a human face on the people, places, events, and social conditions that have shaped the evolution of organized labor", enlivened by illustrations from the celebrated comics journalist Joe Sacco (Library Journal). Now, the authors have added a wealth of fresh analysis of labor's role in American life, with new material on sex workers, disability issues, labor's relation to the global justice movement and the immigrants' rights movement, the 2005 split in the AFL-CIO and the movement civil wars that followed, and the crucial emergence of worker centers and their relationships to unions. With two entirely new chapters—one on global developments such as offshoring and a second on the 2016 election and unions' relationships to Trump—this is an "extraordinarily fine addition to U.S. history [that] could become an evergreen . . . comparable to Howard Zinn's award-winning *A People's History of the United States*" (Publishers

Weekly). “A marvelously informed, carefully crafted, far-ranging history of working people.” —Noam Chomsky

Driven to Ride Nov 24 2022 A high-octane memoir of unflappable determination from an X-Games and Paralympics champion When "Monster" Mike Schultz won snowboarding gold in Pyeongchang, South Korea, it was the culmination of a decade of reinvention, in every sense of the word. Ten years earlier he'd lain bleeding on the side of a mountain after a devastating snowmobile accident. Now he stood tall on the Paralympic podium, supported by a prosthetic knee and foot of his own creation. *Driven to Ride* chronicles Schultz's improbable journey following a lifesaving amputation. From a place of debilitating pain and depression, he tapped into the same sense of adventure that had once taken him to the top of competitive snowmobile racing and followed it to the pinnacle of an entirely new sport: adaptive snowboarding. As he launched himself into the world of adaptive sports, Schultz's ambition was only tempered by his need for better equipment—prostheses that could withstand the vibrations of a motocross bike or the impact of rough terrain. His obsessive tinkering, without any formal engineering background, has presented yet another new path designing innovative prostheses for athletes and wounded military veterans. Inspiring and thrilling in equal measure, this is a singular story of uncommon strength, ingenuity, and seizing golden opportunities.

Saving Shiloh Dec 01 2020 Marty Preston wonders why it is that despite Judd Traver's attempts to redeem himself everyone is still so willing to think the worst of him. Marty's friend David is sure that Judd will be named as the murderer of a man who has been missing. Others are sure that Judd is behind a series of burglaries in the area. But Marty's parents and, with some trepidation, Marty himself persist in their attempts to be good neighbors and to give Judd a second chance. Now that

Marty has Shiloh, maybe he can help Judd to take better care of his other dogs. Then again, maybe folks are right -- there's no way a Judd Travers can ever change for the good. Then a terrifying life-or-death situation brings this dilemma into sharp focus. Saving Shiloh is a powerful novel that brings this trilogy to a close.

Lone Rider Sep 22 2022 In 1982, at the age of just twenty-three and halfway through her architecture studies, Elspeth Beard left her family and friends in London and set off on a 35,000-mile solo adventure around the world on her 1974 BMW R60/6. Reeling from a recent breakup and with only limited savings from her pub job, a tent, a few clothes and some tools, all packed on the back of her bike, she was determined to prove herself. She had ridden bikes since her teens and was well travelled. But nothing could prepare her for what lay ahead. When she returned to London nearly two and a half years later she was stones lighter and decades wiser. She'd ridden through unforgiving landscapes and countries ravaged by war, witnessed civil uprisings that forced her to fake documents, and fended off sexual attacks, biker gangs and corrupt police convinced she was trafficking drugs. She'd survived life-threatening illnesses, personal loss and brutal accidents that had left permanent scars and a black hole in her memory. And she'd fallen in love with two very different men. In an age before email, the internet, mobile phones, satnavs and, in some parts of the world, readily available and reliable maps, Elspeth achieved something that would still seem remarkable today. Told with honesty and wit, this is the extraordinary and moving story of a unique and life-changing adventure.
