The host of CBC Radio's Under the Influence, Terry O'Reilly, uncovers the surprising power of screwing up The Incredible Hulk was originally supposed to be grey, but a printing glitch led to the superhero's iconic green colour. NHL hall-of-famer Serge Savard's hockey career nearly ended prematurely, not

because of an injury, but because of an oversight. And the invention of a beloved treat, the Popsicle, began with a simple mistake. In his fascinating and meticulously researched new book, Terry O'Reilly recounts how some of the biggest breakthroughs and best-loved products originated with a mistake. Some people's "mistakes" led to dramatic life changes—losing their jobs, their companies and often their credibility—only for them to discover new opportunities on the other shore. Other people's mistakes seemed minor, almost insignificant—and yet they unexpectedly resulted in a famous brand, a legendary band or a groundbreaking work of art. And in a few instances, a mistake actually saved lives. The fear of failing often holds us back. *My Best Mistake* will change the way you think about screwing up. It will encourage you to accept mistakes and embrace the obstacles that may arise from these errors, leading you to unexpected breakthroughs and silver linings of your own. This title introduces readers to *Personal Watercraft*. Different types of *Personal Watercraft* are examined, as are their parts and how they operate. A short history of the sport is included, as is a discussion of its risks and appropriate safety equipment. Competitive events such as Watercross, Freeriding, and Super Course are explained, including rules and judging. Xtreme facts provide additional information on this exciting sport. Aligned to Common Core Standards and correlated to state standards. A&D Xtreme is an imprint of Abdo Publishing Company, a division of ABDO. There have been many analyses of leisure, drawing on the social, historical, cultural, temporal, and geographical contexts in which acts of leisure are pursued. Yet these studies lack a theoretical framework that can explain how leisure studies interact in various social contexts (cultural, temporal, or geographical), or as Robert A. Stebbins

conceptualizes it, at levels of society. Here Stebbins explores leisure studies at society's micro, meso, and macro levels. He considers all three as they manifest themselves in the everyday pursuit of leisure, while focusing on the heretofore neglected middle, which he calls the meso side of life. Stebbins not only draws these perspectives together, but does something no one else has: he focuses on the big picture of leisure. *Leisure Activities in Context* examines the entire micro-macro/agency-structure dimension, using theory and research from leisure studies and the sociology of leisure as the vehicles to accomplish this. This book will be a useful theoretical sourcebook on the study of leisure because it provides a blueprint of issues that scholars and students can use to draw deeper meaning from their own studies, and a framework for future research. *Popular Science* gives our readers the information and tools to improve their technology and their world. The core belief that *Popular Science* and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better. *Popular Mechanics* inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle. From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent - and loud - fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the

story of an ecosystem within the United States and the devices that wreak havoc on it - personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat. **Ker-SPLASH!** is an up-to-date, comprehensive look at the hobby and sport of recreational boating and water skiing. It is intended as a guide for both the neophyte and the experienced recreational power boater. The book includes detailed instructions for: (1) Selecting and buying a boat; (2) Making an intelligent engine choice; (3) Selecting boating accessories; (4) Choosing skis, boards, and towables; (5) Selecting a personal slalom ski; (6) Learning to ski and towing a skier; (7) Learning to slalom; (8) Riding and towing other water toys; and (9) Maintenance and safety issues. **Ker-SPLASH!** covers these types of recreational powerboats: sterndrive runabouts, tournament ski boats, mini-jet boats, personal watercraft, offshore performance boats, deck and pontoon boats, outboard ski boats, fish 'n' ski boats, and cuddly cabins. Comparative descriptions and contact addresses of the major boat, ski, wakeboard, and accessory manufacturers are included. **Ker-SPLASH** is not only a reference guide, but it also includes down-to-earth information and entertaining boating stories. **Catastrophic Injuries in Sport and Recreation** is an essential reference

guide to safe participation in a wide variety of sports and recreational activities. A masterful achievement of methodology, it is the first complete epidemiological study and analysis of all catastrophic injuries in all sports and recreational activities that occurred within a large defined geographical area with a large population: ten million people within the province of Ontario between 1986 and 1995. Concentrating on injuries that resulted in death or long term disability, the contributors identify both the personal risk factors for participants and the societal risk factors that are important causes for these kinds of injuries. Providing detailed analysis of 2154 case studies, the contributors demonstrate what went wrong in each event, and show how each injury could have been prevented. Recommending specific prevention strategies for a wide range of injuries, Catastrophic Injuries in Sport and Recreation is a practical medical reference for athletes and doctors alike. HX, SP, SPI, SPX and XP models. Hinckley, Hunt, Little Harbor and Lyman-Morse are names that conjure up visions of sleek luxury yachts, comfortably slicing through even the roughest ocean waters. In the quest to offer the latest technology, many of their designs now feature water-jets instead of traditional propellers. But the latest thing in propulsion isn't new at all. Today's water-jets are the result of more than two centuries of trial and error, exhilarating successes and frustrating defeats experienced by a cast of inventors, entrepreneurs and adventurers who weren't afraid to lay it all on the line. They include a self-taught craftsman backed by the Founding Fathers, the engineers of the Royal Navy, a small-town Ohio genius, a New Zealand sportsman and an American industrialist. Their efforts, which ranged from back-yard tinkering to daring international expeditions contributed to the spectacular technology that now powers everything from fishing boats to frigates. The water-jet is here to stay. David S. Yetman has been a prolific, award-winning boating writer for more than 15 years. He has written four books and more than 200 articles for a broad range of boating magazines including Boating World, Motor Boating, Offshore, Power & Motoryacht, Sail, Soundings, Trailer Boats and Yachting. As a young man, he was involved in several start-up ventures in design, manufacturing and retail sales before embarking on a career in mechanical design and engineering, rising to the level of Engineering Manager for a high-technology company before retiring in 2001. He has been awarded patents for designs of a wide range of products, including motorcycle frames, laboratory apparatus and automated instruments used in DNA research, and enjoys applying his broad technical experience to boating and writing. He and his wife, Pat, live on Hodgdon Island, Maine and cruise the New England coast on

CURMUDGEON, their Albin Tournament Express convertible. Popular Mechanics inspires, instructs and influences readers to help them master the modern world.
