Psychology of Liberation Nov 14 2019 Since the mid-1980s, the psychology of liberation movement has been a catalyst for collective and individual change in communities throughout Latin America, and beyond; and recent political developments are making its powerful, transformative ideas more relevant than ever before. *Psychology of Liberation: Theory and Applications* updates the activist frameworks developed by Ignacio Martin-Baro and Paulo Freire with compelling stories from the frontlines of conflict in the developing and developed worlds, as social science and psychological practice are allied with struggles for peace, justice, and equality. In these chapters, liberation is presented as both an ongoing process and a core dimension of wellbeing, entailing the reconstruction of social identity and the transformation of all parties involved, both oppressed and oppressors. It also expands the social consciousness of professionals, bringing more profound meaning to practice and enhancing related areas such as peace psychology, as shown in articles such as these: Philippines: the role of liberation movements in the transition to democracy. Venezuela: liberation psychology as a therapeutic intervention with street youth. South Africa: the movement for representational knowledge. Muslim world: religion, the state, and the gendering of human rights. Ireland: linking personal and political development. Australia: addressing issues of racism, identity, and immigration. Colombia: building cultures of peace from the devastation of war. *Psychology of Liberation* demonstrates the commitment to overcome social injustices and oppression. The book is a critical resource for social and community psychologists as well as policy analysts. It can also be used as a text for graduate courses in psychology, sociology, social work and community studies.

How to Build Max-Performance Mitsubishi 4G63t Engines Nov 26 2020 The photos in this edition are black and white. Mitsubishi's 4G63t engine is among the most powerful engines ever in the sport-compact world. It's not uncommon to find one of these four-cylinder, iron-block, aluminum-headed, 2-liter turbocharged monsters making more than 1,000 horsepower with the right modifications and tuning - well above the 200-300 hp produced in the factory-made engines. Bolted into such cars as the Mitsubishi Lancer Evolution, Eclipse, and Galant, and the Eagle Talon and Plymouth Laser, the 4G63t has more than a cult following among sport-compact enthusiasts, who know and respect this engine's immense performance potential at the track or on the street. Up until now, in-depth performance information on the 4G63t has been hard to find. For this book, author Robert Bowen went straight to the source, Robert Garcia of Road/Race Engineering in Santa Fe Springs, California. RRE is the most well-known and respected Mitsubishi turbo performance shop in the United States, and Garcia is its in-house engine builder. Mitsubishi enthusiasts will benefit from Garcia's expertise and be able to build better, stronger engines than ever before. "How to Build Max-Performance Mitsubishi 4G63t Engines" covers every system and component of the engine, including the turbocharger system and engine management. More than just a collection of tips and tricks, this book includes a complete history of the engine and its evolution, an identification guide, and advice for choosing engine components and other parts. Profiles of successful built-up engines show the reader examples of what works, and the book includes helpful guidance for choosing your own engine building path.

City of Inmates Oct 14 2019 Los Angeles incarcerates more people than any other city in the United States, which imprisons more people than any other nation on Earth. This book explains how the City of Angels

became the capital city of the world's leading incarcerator. Marshaling more than two centuries of evidence, historian Kelly Lytle Hernandez unmask how histories of native elimination, immigrant exclusion, and black disappearance drove the rise of incarceration in Los Angeles. In this telling, which spans from the Spanish colonial era to the outbreak of the 1965 Watts Rebellion, Hernandez documents the persistent historical bond between the racial fantasies of conquest, namely its settler colonial form, and the eliminatory capacities of incarceration. But City of Inmates is also a chronicle of resilience and rebellion, documenting how targeted peoples and communities have always fought back. They busted out of jail, forced Supreme Court rulings, advanced revolution across bars and borders, and, as in the summer of 1965, set fire to the belly of the city. With these acts those who fought the rise of incarceration in Los Angeles altered the course of history in the city, the borderlands, and beyond. This book recounts how the dynamics of conquest met deep reservoirs of rebellion as Los Angeles became the City of Inmates, the nation's carceral core. It is a story that is far from over.
