Great Lakes, Great Legacy? Dec 15 2019
Results of a 2-year study of the Great Lakes basin to assess environmental conditions and trends and the adequacy of government programs. The study explores the linkages between economic development and environmental quality in the Great Lakes basin and identifies the need for greater integration of environmental considerations with economic decisions affecting agriculture, energy, and other social investments. The study also emphasizes the importance of institutional structure to assure widespread involvement and participation in community decisions and action to deal with these issues.

Psychotropic Drugs of Abuse May 12 2022 A volume surveying the wide and interdisciplinary nature of current studies on the mechanism of action of psychotropic drugs presented in a way which emphasizes the value of exploiting the interrelationship between molecular and behavioral neuroscience. One of the objectives of this volume of the encyclopedia is to seek to relate the recent advances in our understanding of the molecular basis of neuropharmacology to the current explanations for the behavioral and rewarding properties of "recreational" drugs.

Early Phase Drug Evaluation in Man Nov 18 2022 Early Phase Drug Evaluation in Man is a comprehensive, practical guide that covers pre-clinical information relevant to early human studies, including pharmaceutical, metabolic, toxicological, and regulatory aspects, as well as the general considerations relevant to all early human studies. Each major therapeutic area is considered by class of activity of drug. The chapters describe what measurements of drug activity are available in healthy human subjects and in patients, how to make the measurements, their value and their limitations. The contributors have been drawn

internationally from the pharmaceutical industry and academia. Early Phase Drug Evaluation in Man will provide an important reference guide for industry and academic professionals involved in the development of new drugs.
