Southern stories set in

Mississippi. In Tell Me It Hasn't

Come to This, a lonely woman

waves to passing motorists in

the hope one will stop and visit

her, and when one does she

gets cold feet, while The

Snopes Who Saved Huckaby is

on a preacher whose love of

female flesh lands him in

trouble.

Flux Lines Nov 12 2021 There

are two constants in the poetry of John Mannone: love and science... And they are intertwined - his poems flow effortlessly between poles of desire and precious, precise knowledge. In the world of poetry there is no one who can mine science for metaphor the way Mannone does. Nor move to love so naturally. Roald Hoffmann, chemist and writer, professor emeritus at Cornell University and co-recipient of the 1981 Nobel Prize in Chemistry John C. Mannone's Flux Lines offers a lyrical melding of worlds: love, science, sensuality, geography, heart, astronomy, and wit. The poet knows his science, and knows how to cut a line in a

heartbreaking rhythm. Love is the unifying force here, dynamic movement is a constant. The poet is equally at home in mystery and in certainty, in wonder and in the swing of late fall vines or his lover's hair. A magical volume, this is one that readers will return to for song and hope, for sustenance. Marilyn Kallet, author of *How Our Bodies Learned*, Black Widow Press and the 2018, 2019 Knoxville Poet Laureate "We make our own galaxy," John C. Mannone says, and at the center of Flux Lines, his big and rueful heart "supernovas" in its attempts to reveal moons, stardust, magnetic fields, dunes, the irises of eyes, eclipses, and all

the ways in which our lives-if not our words-"orbit" one another. Mannone brings a science-minded curiosity and exuberance to his poems, a gravitational pull toward love, a "swirl of intoxication," if not a profound desire to peer down into the "core/structure" of words, thoughts, and emotions. "Who can tell/one sparrow from another/when they fall?" he asks, yet he, too, is falling-through space, through time, through the intricate and multiple universes which love has formed of his heart. Jeff Hardin, author of 5 full collections, including Restoring the Narrative (Donald Justice Poetry Prize) and No Other Kind of World (X. J. Kennedy

Prize) Poet-physicist John Mannone expands the vocabulary of love to include science-and both love and science are better for it. Look at how he captures sights and happenings. From "When the Comet Dust Settles" ". . . each time a meteor firefly'd the night." From "Tramontane," "Your thunderous voice, wet with rain, monsoons me . . ." In "The Weatherman Said It Might Rain," as human relations and the sky point toward a tornado, he writes: "I can hear distant rumblings of a locomotive wind." In "Thermodynamics," in describing the end of a relationship, he says: "Refrigerators don't make the cold, they remove the heat."

Read these lines-read these poems-aloud. They are accurately said. They are differently said. Best of all in poetry, they are well said. Mark Littmann, Professor, Hill Chair of Excellence in Science Writing at the University of Tennessee Knoxville and author of Totality: The Great American Eclipses of 2017 and 2024 and 5 other astronomy books and 36 planetarium shows *The Legend of Briggs & Stratton* May 26 2020 The greatest small engines in the world are manufactured by Briggs & Stratton. From the informal partnership Stephen F. Briggs and Harold M. Stratton formed in 1908, Briggs & Stratton has evolved

into an industry leader whose name is synonymous with the lawn mower engines it pioneered. The Legend of Briggs & Stratton, 208 pages, is filled with 125 color and 145 black & white images covering Briggs & Stratton's fascinating history.
