Over a quarter of a million XS650s in forty different variations were produced before production ceased in 1985. 31 articles include road and comparison tests, history, new model intro's, owner survey, performance & technical data, engine rebuild. Models XS-1, XS-1B, XS-2, XS-650, B, C, D, E SE, F, SF, Special. 257 pages and more than 500 illustrations and charts, size 8.25 x 10.75 inches. This workshop manual is a compilation of 12 original Honda publications. It includes a reproduction of the original 100cc-125cc factory workshop manual plus the 11 factory supplements that extend the coverage of that original manual through 1984. The original 'base' manual for this series of motorcycles was first published in 1970 in softbound format. In 1971 it was changed to a ring-bound publication, as this better suited the addition of supplements for model updates without the need for printing an entirely new manual. The 1970 softbound manual covered the CB100, CL100 and SL100 and in 1971 that softbound publication was updated and reprinted to include the CB125S, CD125S and the SL125. A little later, but still in 1971, the first ring-bound version was issued which now included a supplement for the TL125. However, by the end of 1976 all of those models, with the exception of the CB125, had been discontinued, but the base ring-bound manual continued to be updated through 1984 for the CB125 models. For some inexplicable reason, even though 1985 was the final year for the CB125, instead of publishing yet another update, Honda issued a singular manual specific to the 1985 model only. This 257

page manual covers the 1970 to 1984 single cylinder street, scrambler, motosport and trials models. The primary focus is the maintenance and repair of the major mechanical and electrical components including: Engine, Transmission, Clutch, Fuel, Electrical, Frame, Suspension and Steering, models covered are: 100cc Street-CB100 100cc Scrambler-CL100 100cc Motosport-SL100 125cc Street-CB125-CB125S-CB125J-CD125S 125cc Motosport-SL125 125cc Trials-TL125 Many of the earlier Honda motorcycle models were often introduced at different times in different countries using different model names or designations. For example the CB125 was first introduced in 1971 but was not available in the USA (as the CB125S) until 1973. These varying release dates and differing model designations often lead to difficulty in selecting the correct workshop manual. Worse yet, owners of this series of 100cc and 125cc singles are subjected to considerable confusion surrounding the appropriate selection from the multitude of OEM publications that have recently flooded the on-line marketplace. Honda published 11 different supplements and addendums to the original ring-bound base manual and many of these are listed as workshop manuals by individuals that deliberately intend to deceive or really have no idea what they are selling. In addition, many of the so-called workshop manual reprints are incomplete. Consequently, should you decide to purchase your manual elsewhere, you are advised to confirm that it includes all 257 pages of the original factory manual. Owners of the 1959-1966 twin cylinder 125-150cc 'Benly' C92 & C95 series are directed to our Honda factory workshop manual ISBN 9781588500823, owners of the 1964-1980 twin cylinder 125-150cc models will require our workshop manual ISBN 9781588502643. Finally, please note that the text in the original Honda Factory Workshop Manual was translated from Japanese into English. Consequently, some of the phrasing, grammar, punctuation and word usage may be subtly different from that commonly used in the English language. However the information, as presented, is readily understandable. In addition, while we have done our best to identify any anomalies and errors that may have occurred during the original translation process, we are certain that we will have missed one or two and we request your indulgence in ignoring them. 106 pages, 68 black & white illustrations, size 5.5 x 8.5 inches. Originally published under the title The Book of the Honda 90 by John Thorpe, this book is one of The Motorcyclist's Library series published in the USA by Floyd Clymer by arrangement with the original publishers Pitman Ltd. of London, England. It includes complete technical data, service and maintenance information and detailed instructions for the repair and overhaul of the major mechanical and electrical components for all models of Honda 90 Motorcycles through 1966. There is adequate detailed text and diagrams to assist in major refurbishing such as an engine rebuild or even a complete renovation. Applicable to all 90cc variations including the S90, CM90, C200, S65, Trail 90 & C65 models, this publication has been Out-of-print and unavailable for many years and is becoming increasingly more difficult to find on the secondary market and we are pleased to be able to offer this reproduction as a service to all Honda enthusiasts worldwide.

Systematic, illustrated units equip student mechanics and motorcycle owners with knowledge of the skills that are essential for successful motorcycle maintenance and repair This is the book collectors, restorers, and nostalgic fans of the machines of our youth have been waiting to arrive! After years of extensive research through archives of motorcycle magazines, books, and brochures from the classic era, the founder of the seminal Tiddlerosis website has published his magnum opus on the subject. The Tiddler Invasion covers many miles of two-wheeled motorized nostalgia. Thousands of facts, figures, colors, specifications, and even original prices are packed into more than 600 detailed pages. The story of the invasion of the USA by small motorcycles and scooters in the 1955-1975 era is told with enthusiasm for these many wondrous little machines by someone who lived through that special time in our nation's history. The book includes approximately 180 charts of the popular models sold in the U.S. during the period and well over 400 B&W photos. The author and two major collectors of these special little bikes share nostalgic personal remembrances of a wondrous time past. The focus of The Tiddler Invasion is on the most common machines of the period, mostly from Japan. Honda, Yamaha, Kawasaki, and Suzuki each have a detailed chapter. Bridgestone, Hodaka, Tohatsu, and other early brands share a chapter. The story basically begins with the arrival of the Honda 50 in 1959 and ends with the release of the Gold Wing in 1975. The tiddler era rose to prominence in the Sixties and began its slow descent into obscurity as the Kawasaki Mach III, the Honda 750 Four, and the Kawasaki Z-1 took over the U.S. motorcycle market. The major brands from the USA are detailed in a chapter, too. This group is of course dominated by Harley-Davidson, Allstate, and Cushman, just as it was back then. There are no H-D Big Twins here, but plenty of Hummers, Toppers, Super Eagles, Mopeds and Twingles! There were countless European brands and models imported in the Sixties, but only those of significance are included. As we all know, most of the European models were either large road burners, obscure small Italian bikes and scooters, or off-road competition machines. You will not find Nortons, Guzzis, Maicos or Parillas here, but the European chapter is quite sizable nonetheless. The most difficult element to communicate to a prospective reader is the definition of the machines and parameters included in this book. The concept of The Tiddler Invasion is unique to the time and place. Although the 50cc machines began Americans' rush to motorcycle dealerships, the market rapidly expanded from that point. The smallest machines covered in the book are the true tiddlers, but these little putt-putts for kids comprised only the tip of the iceberg. Many classic 250cc sports machines such as the Ducati Diana, Harley-Davidson Sprint H, Honda Hawk, Yamaha YDS-2, Suzuki X-6, and Bultaco Metralla roar through the pages of this book! The Kawasaki Triples scream through it so much you will choke on the two-stroke smoke! The author has a thing for the Honda Scramblers, as if they were dark-haired beauties in bikinis or something. The kings of upswept exhaust pipes and crossbrace handlebars get their own chapter. Once you have possession of this book, you will never want to give it up. The Tidder Invasion is not a coffee table book of pretty color

pictures. It is a reference guide crammed to the Snuff-or-Nots with useful info for collectors and enthusiasts of small classic motorcycles. The author began collecting motorcycle brochures and magazines in 1962. Reproductions of and detailed information from these sources are included in this extensive reference guide. The author of this book is not a collector, a photographer, or a restorer. He is a super-nerd who clearly loves these classic machines. The earliest part of this book was written in 1985 on a 1959 IBM typewriter. Now with the help of modern computers, the whole, wonderful, magical story of that very special era in American history can finally be told! This series of comprehensive manuals gives the home mechanic an in-depth look at specific areas of auto repair.
