web this is not an elementary textbook about conduction

heat transfer here is its index 1 foundations of heat transfer 2 lumped integral and differential formulations 3 steady one dimensional problems 4 steady two and three dimensional problems 5 separation of variables orthogonal functions 6 separation of variables

web heat as evidenced from experimental observations is transferred from a region of higher temperature to a region of lower temperature in a medium from a microscopic or molecular standpoint the transfer of heat is thought to come about through the exchange of kinetic energy between molecules

web arpaci v 1966 conduction heat transfer addison wesley reading has been cited by the following article title a new algorithm based on differential transform method for solving partial differential equation system with initial and boundary conditions authors chenlu huang jiwei li falin
