Design and implementation of structured cabling Convenience is the basic idea of structural

network cable system. One should create such a network, for anybody to connect to anywhere in the building. This micro-course introduces the reader to the concept of designing of structural cabling systems. We discuss the most important rules that the designer/installer must follow when building a network. The course provides also the practical knowledge necessary for the installer to realize the project. The infrastructural development of the capital intensive telecom sector would require a large number of people. These people would be managers, who need not necessarily be telecom engineers. In fact a large number of them would be from very diverse academic backgrounds, They will have to manage the technology and eventually act as a conduit for the technology to reach the end user. They ought to know more about the management and applications of technology rather than the technology itself. Traditionally telecom is a hi-tech subject. Telecom engineers have to study the subject from the technical and mathematical perspectives. This book is for those, who would like to know all about telecommunications, without delving into detailed technical treatment of the subject. At the same time it will be a satisfying update for telecom engineers and professionals. Most books on telecommunications have a large technical content. This book deals with concepts which are essential for handling day to day affairs by a large number of decision makers. The technical depth is more than adequate. Its strength lies in the simplicity of approach and presentation, a non-mathematical treatment of the subject and above all a very wide coverage. The global telecom infrastructure has been presented as a 'seamless system,' one component leading to the other. The structure of the book flows out of this concept. We have strived to present both analog and digital communications, techniques and their applications in a straight forward manner. More than four hundred diagrams and a number of product photographs have been used as illustrations. Where relevant, live networks and systems from the Indian context have been used as examples for easy understanding. Clear shift from voice to data and now more recently towards picture and video transmission has been emphasised and has been the overall theme while structuring the entire book as well as each chapter. For an accessible and comprehensive survey of telecommunications and data communications technologies and services, consult the Telecommunications and Data Communications Handbook, which includes information on origins, evolution and meaningful contemporary applications. Find discussions of technologies set in context, with details on fiber optics, cellular radio, digital carrier systems, TCP/IP, and the Internet. Explore topics like Voice over Internet Protocol (VoIP); 802.16 & WiMAX; Passive Optical Network (PON); 802.11g & Multiple Input Multiple Output (MIMO) in this easily accessible guide without the burden of technical jargon. This book is a one-stop resource on all the critical aspects of planning and designing hospitals, one of the most complex healthcare projects to undertake. A well-planned and designed hospital should control infection rate, provide safety to patients, caregivers and visitors, help improve patients' recovery and have scope for future expansion and change. Reinforcing these basic principles, guidance on such effective planning and designing is the key focus. Readers are offered insights into eliminating shortcomings at every stage of setting up a hospital which may not be feasible to rectify later on through alterations. Chapters from 1 to 12 of the book provide exhaustive notes on initial planning, such as detailed project reports, feasibility studies, and area calculation. Chapters 13 to 27 include designing and layout of all the essential departments/units such as OPD, emergency, intermediate care, diagnostics, operating rooms, and intensive care units. Chapters 28 to 37 cover designing support services like sterilization department, pharmacy, medical gas pipeline, kitchen, laundry, medical record, and mortuary. Chapters 38 to 48 take the readers through planning other services like air-conditioning and ventilation, fire safety, extra low voltage, mechanical, electrical, and plumbing services. Chapter 49 is for the planning of medical equipment. A particular chapter on "Green" hospital designing is included.
