Not What You Think blows the dust off dated misperceptions of the Bible and engages the problems of this book head-on--the parts that make modern readers squeamish, skeptical, and uncertain. If you're skeptical about the Bible, you're not alone. The Bible is seen by many contemporary readers as intolerant, outdated, out of step with societal norms at best, and a tool of oppression at worst. In this earnest and illuminating read, millennial thought leaders and aspiring theologians Michael and Lauren McAfee are here to say: fair enough. But they're also here to raise a few questions of their own: What if we cleared the deck on our preconceptions of the Bible and encountered it anew? What if we came with the understanding that our questions are welcome? And what if the Bible presents less of a system to figure out, and more of a story to step into--a story with more surprising plot twists than we might think? Michael and Lauren spent their childhoods in church and Sunday school, they spent part of their twenties finding their way in the world in New York City, and today they're shaping their careers while pursuing doctoral studies in theology and ethics. Along the way, they've had to wrangle very real questions--both their own, and of their friends--about why, where, and how the most controversial book in history fits in our world today. Join Michael and Lauren as they explore the nature of the Bible--an ancient mosaic of story, literature, history, and poetry--and what it means for this generation and its relationship with God. Ultimately, Not What You Think is an invitation to come and see, and be surprised. There are so many ways the world around you is not what you think it is. After all, the world is a strange place and it's growing more bizarre every day. Our world is made even stranger when we find out that beliefs and things we've held dear for ages, are not what we think they are. But don't worry, You think you know everything, you don't know how wrong you are book will set the record straight on all the common myths that most people take for fact, making you the most well-informed person in town. So next time someone proclaims that Napoleon Bonaparte was short, or that shaving causes hair to grow back thicker, you can correct them, and tell them smugly that everything they think they know is wrong. This book will expose the truth behind common myths and misconceptions. It may turn some of your thoughts about the world upside down, from law, history, religion, science, to body, food, mind, sport and nature. It also gives you a whole new look at the world around and you will soon realize that everything you think you know about the world is wrong. Find lasting freedom

from difficult emotions with skills grounded in cognitive behavioral therapy (CBT) and emotional schema therapy. If you struggle with difficult emotions, you should know that you aren't alone. Many people feel sad, worried, or stressed out—whether as a result of depression, anxiety, or simply dealing with the common struggles of daily life. Emotions are a natural and healthy part of being human. It's how we cope with these difficult emotions that reveal our true capacity for happiness, love, and joy. Don't Believe Everything You Feel offers a groundbreaking approach blending CBT and emotional schema therapy to help you explore your own deeply held personal beliefs about emotions, determine if these beliefs are helpful or harmful, and find the motivation to adopt alternative, healthier coping strategies. Each chapter contains exercises such as self-assessment, expressive writing, or guided questioning to help you manage your emotions more productively. There's no such thing as a "bad," emotion. But if you're experiencing sadness, anger, or anxiety most of the time, you need to find balance. This book will show you how to better cope with your emotions and live a full, meaningful life.

Depression and anxiety are now at epidemic levels. Why? Across the world, scientists have uncovered evidence for nine different causes. Some are in our biology, but most are in the way we are living today. *Lost Connections* offers a radical new way of thinking about this crisis. It shows that once we understand the real causes, we can begin to turn to pioneering new solutions – ones that offer real hope. For the first time an award-winning Harvard professor shares the lessons from his wildly popular course on classical Chinese philosophy, showing you how these ancient ideas can guide you on the path to a good life today. The lessons taught by ancient Chinese philosophers surprisingly still apply, and they challenge our fundamental assumptions about how to lead a fulfilled, happy, and successful life. Self-discovery, it turns out, comes through looking outward, not inward. Power comes from holding back. Good relationships come from small gestures. Spontaneity comes from practice. And excellence comes from what you choose to do, not your “natural” abilities. Counterintuitive. Countercultural. Even revolutionary. These powerful ideas have made Professor Michael Puett's course the third most popular at Harvard University in recent years, with enrollment surging every year since it was first offered in 2006. It's clear students are drawn by a bold promise Professor Puett makes on the first day of class: “These ideas will change your life.” Now he offers his course to the world. It can be hard for those of us living in the twenty-first century to see how fourteenth-century Buddhist teachings still apply. When you're trying to figure out which cell phone plan to buy or brooding about something someone wrote about you on Facebook, lines like “While the enemy of your own anger is unsubdued, though you conquer external foes, they will only increase” can seem a little obscure. Thubten Chodron's illuminating explication of Togmay Zangpo's revered text, *The Thirty-seven Practices of Bodhisattvas*, doesn't just explain its profound meaning; in dozens of passages she lets her students and colleagues share first-person stories of the ways that its teachings have changed their lives. Some bear witness to dramatic transformations—making friends with an enemy prisoner-of-war, finding peace after the murder of a loved one—while others tell of smaller lessons, like waiting for something to happen or coping with a minor injury. A teenage girl wonders if she's inherited more than just a heart from her donor in this compulsively readable debut. Seventeen-year-old Chloe had a plan: work hard, get good grades, and attend a top-tier college. But after she collapses during cross-country practice and is told that she needs a new heart, all her careful preparations are laid to waste. Eight months after her transplant, everything is different. Stuck in summer school with the underachievers, all she wants to do now is grab her surfboard and hit the waves--which is strange, because she wasn't interested in surfing before her transplant. (It doesn't hurt that her instructor, Kai, is seriously good-looking.) And that's not all that's strange. There's also the vivid recurring nightmare about crashing a motorcycle in a tunnel and memories of people and places she doesn't recognize. Is there something wrong with her head now, too, or is there another explanation for what she's experiencing? As she searches for answers, and as her attraction to Kai intensifies, what she learns will lead her to question everything she thought she knew--about life, death, love, identity, and the true nature of reality.

INSTANT NEW YORK TIMES BESTSELLER A dramatically new understanding of human history, challenging our most fundamental assumptions about social evolution—from the development of agriculture and cities to the origins of the state, democracy, and inequality—and revealing new possibilities for human emancipation. For generations, our remote ancestors have been cast as primitive and childlike—either free and equal innocents, or thuggish and warlike. Civilization, we are told, could be achieved only by sacrificing those original freedoms or, alternatively, by taming our baser instincts. David Graeber and David Wengrow show how such theories first emerged in the eighteenth century as a conservative reaction to powerful critiques of European society posed by Indigenous observers and intellectuals. Revisiting this encounter has startling implications for how we make sense of human history today, including the origins of farming, property, cities, democracy, slavery, and civilization itself. Drawing on pathbreaking research in archaeology and anthropology, the authors show how history becomes a far more interesting place once we learn to throw off our conceptual shackles and perceive what's really there. If humans did not spend 95 percent of their evolutionary past in tiny bands of hunter-gatherers, what were they doing all that time? If agriculture, and cities, did not mean a plunge into hierarchy and domination, then what kinds of social and economic organization did they lead to? The answers are often unexpected, and suggest that the course of human history may be less set in stone, and more full of playful, hopeful possibilities, than we tend to assume. *The Dawn of Everything* fundamentally transforms our understanding of the human past and offers a path toward imagining new forms of freedom, new ways of organizing society. This is a monumental book of formidable intellectual range, animated by curiosity, moral vision, and a faith in the power of direct action. Includes Black-and-White Illustrations

In the years following her role as the lead author of the international bestseller, *Limits to Growth*—the first book to show the consequences of unchecked growth on a finite planet—Donella Meadows remained a pioneer of environmental and social analysis until her untimely death in 2001. *Thinking in Systems*, is a concise and crucial book offering insight for problem solving on scales ranging from the personal to the global. Edited by the Sustainability Institute's Diana Wright, this essential primer brings systems thinking out of the realm of computers and equations and into the tangible world, showing readers how to develop the systems-thinking skills that thought leaders across the globe consider critical for 21st-century life. Some of the biggest problems facing the world—war, hunger, poverty, and environmental degradation—are essentially system failures. They cannot be solved by fixing one piece in isolation from the others, because even seemingly minor details have enormous power to undermine the best efforts of too-narrow thinking. While readers will learn the conceptual tools and methods of systems thinking, the heart of the book is grander than methodology. Donella Meadows was known as much for nurturing positive outcomes as she was for delving into the science behind global dilemmas. She reminds readers to pay attention to what is important, not just what is quantifiable, to stay humble, and to stay a learner. In a world growing ever more complicated, crowded, and interdependent, *Thinking in Systems* helps readers avoid confusion and helplessness, the first step toward finding proactive and effective solutions. Risk everything . . . for love with this #1 New York Times bestseller. What if you couldn't touch anything in the outside world? Never breathe in the fresh air, feel the sun warm your face . . . or kiss the boy next door? In *Everything, Everything*, Maddy is a girl who's literally allergic to the outside world, and Olly is the boy who moves in next door . . . and becomes the greatest risk she's ever taken. My disease is as rare as it is famous. Basically, I'm allergic to the world. I don't leave my house, have not left my house in seventeen years. The only people I ever see are my mom and my nurse, Carla. But then one day, a moving truck arrives next door. I look out my window, and I see him. He's tall, lean and wearing all black—black T-shirt, black jeans, black sneakers, and a black knit cap that covers his hair completely. He catches me looking and stares at me. I stare right back. His name is Olly. Maybe we can't predict the future, but we can predict some things. For example, I am certainly

going to fall in love with Olly. It's almost certainly going to be a disaster. Everything, Everything will make you laugh, cry, and feel everything in between. It's an innovative, inspiring, and heartbreakingly romantic debut novel that unfolds via vignettes, diary entries, illustrations, and more. And don't miss Nicola Yoon's *The Sun Is Also A Star*, the #1 New York Times bestseller in which two teens are brought together just when it seems like the universe is sending them in opposite directions. Humans are hardwired for awe. Our hearts are always captured by something—that's how God made us. But sin threatens to distract us from the glory of our Creator. All too often, we stand in awe of everything but God. Uncovering the lies we believe about all the earthly things that promise us peace, life, and contentment, Paul Tripp redirects our gaze to God's awe-inducing glory—showing how such a vision has the potential to impact our every thought, word, and deed. Revealing the workings and dangers of freight shipping, which is the key to our economy, environment and civilization, the author sails from Rotterdam to Suez to Singapore to present an eye-opening glimpse into an overlooked world filled with suspect practices, dubious operators and pirates. The author explores the essence of what it means to be a woman—in body and mind—as she shares her thoughts on everything from organs to orgasm and menopause. This book is the story of human beings and how we create our experience of reality. But perhaps more importantly, how when any of us truly understands how we create reality, surprising and profound changes occur in our lives and in the world around us. "One Thought Changes Everything" begins with a moment in Mara Gleason's life, at 11-years old, when her father came across an understanding of the mind that dramatically changed him as a father and business leader. Her curiosity in what exactly changed him led her down the path of training and then a career sharing these principles of the mind with people from all walks of life. From the man at an IT company who decided to stop living in his basement and stop hitting his daughter, to the professional athlete who began living out his dreams again after having given up, to the US Marine who realized a deeper love for humanity than he ever knew was possible, she has observed this understanding profoundly influence the lives of her clients, and the lives of those around them. Gleason weaves together personal, humorous and deeply touching stories of her own new thoughts that have changed the trajectory of her life, as well as those of her clients. We follow her throughout her evolution in life and career to today when Gleason shares perhaps her biggest new thought yet - that this understanding of the mind is the one thing that would solve every global issue of our time. She offers the radically hopeful, yet simple message that at the source of all issues, whether personal, organizational, or global is the misunderstanding of the mind that pervades society today. The change we see in her father, in Mara herself, and in her clients when they discover how the mind truly works, are the very same changes that would dissolve the greatest issues of our time from terrorism and war to addictions, inequality, and climate change. There is not a single issue humanity faces that is not fueled by a misunderstanding of the mind, and that could absolutely be solved by a new understanding. Whether you want to understand yourself better, your relationships, your business, or the world at large, "One Thought Changes Everything" offers a quietly simple solution that just may rock your world, and in turn change the world. Faith is joy is love is hope in this novel of exquisite power and everyday miracles, reminiscent of Barbara Kingsolver's *THE POISONWOOD BIBLE*. Thomas can see things no one else can see. Tropical fish swimming in the canals. The magic of Mrs. Van Amersfoort, the Beethoven-loving witch next door. The fierce beauty of Eliza with her artificial leg. And the Lord Jesus, who tells him, "Just call me Jesus." Thomas records these visions in his "Book of Everything." They comfort him when his father beats him, when the angels weep for his mother's black eyes. And they give him the strength to finally confront his father and become what he wants to be when he grows up: "Happy." In New York City, follows the breakup of teenaged best friends Cleo and Layla, told in alternating timelines. Do you believe that you can consistently beat the stock market if you put in the effort? —that some people have extrasensory perception? —that crime and drug abuse in America are on the rise? Many people hold one or more of these beliefs although research shows that they are not true. And it's no wonder since advertising and some among the media promote these and many more questionable notions. Although our creative problem-solving capacity is what has made humans the successful species we are, our brains are prone to certain kinds of errors that only careful critical thinking can correct. This enlightening book discusses how to recognize faulty thinking and develop the necessary skills to become a more effective problem solver. Author Thomas Kida identifies "the six-pack of problems" that leads many of us unconsciously to accept false ideas: · We prefer stories to statistics. · We seek to confirm, not to question, our ideas. · We rarely appreciate the role of chance and coincidence in shaping events. · We sometimes misperceive the world around us. · We tend to oversimplify our thinking. · Our memories are often inaccurate. Kida vividly illustrates these tendencies with numerous examples that demonstrate how easily we can be fooled into believing something that isn't true. In a complex society where success—in all facets of life—often requires the ability to evaluate the validity of many conflicting claims, the critical-thinking skills examined in this informative and engaging book will prove invaluable. An introductory guide to critical thinking identifies innate biases and traps that challenge the brain's understandings of the world, arguing that skepticism is a constructive and optimistic attitude that can alleviate susceptibility to nonsense and delusion. Original. A media expert and network commentator examines the welter of misinformation--generated by politicians and the media alike--that surrounds political campaigns. If you pride yourself on thinking outside the box, then you'll love *The Everything Lateral Thinking Puzzles Book!* With hundreds of fun and imaginative problems for avid puzzlers like you, this all-in-one guide presents ridiculous scenarios that you can actually solve with simple common sense—and a little creativity! Organized by puzzle type and subject matter, simple and challenging riddles abound in this interactive book. Whether you're a beginner or a seasoned expert, you'll test your wits with such tantalizing puzzles as this one: Puzzle: A doctor mixed a batch of medicine for his client and then drank it down himself. Why? Clues: 1. It tasted good! 2. It worked better with a straw. Solution: Coca-Cola was invented when a doctor was mixing headache medication to taste good. The approval board found that the medicine tasted better than it worked, so they carbonated the liquid and then marketed it! **NEW YORK TIMES BESTSELLER** • "A meditation on sense-making when there's no sense to be made, on letting go when we can't hold on, and on being unafraid even when we're terrified."—Lucy Kalanithi "Belongs on the shelf alongside other terrific books about this difficult subject, like Paul Kalanithi's *When Breath Becomes Air* and Atul Gawande's *Being Mortal*."—Bill Gates **NAMED ONE OF THE BEST BOOKS OF THE YEAR BY REAL SIMPLE** Kate Bowler is a professor at Duke Divinity School with a modest Christian upbringing, but she specializes in the study of the prosperity gospel, a creed that sees fortune as a blessing from God and misfortune as a mark of God's disapproval. At thirty-five, everything in her life seems to point toward "blessing." She is thriving in her job, married to her high school sweetheart, and loves life with her newborn son. Then she is diagnosed with stage IV colon cancer. The prospect of her own mortality forces Kate to realize that she has been tacitly subscribing to the prosperity gospel, living with the conviction that she can control the shape of her life with "a surge of determination." Even as this type of Christianity celebrates the American can-do spirit, it implies that if you "can't do" and succumb to illness or misfortune, you are a failure. Kate is very sick, and no amount of positive thinking will shrink her tumors. What does it mean to die, she wonders, in a society that insists everything happens for a reason? Kate is stripped of this certainty only to discover that without it, life is hard but beautiful in a way it never has been before. Frank and funny, dark and wise, Kate Bowler pulls the reader deeply into her life in an account she populates affectionately with a colorful, often hilarious retinue of friends, mega-church preachers, relatives, and doctors. *Everything Happens for a Reason* tells her story, offering up her irreverent, hard-won observations on dying and the ways it has taught her to live. Praise for *Everything Happens for a Reason* "I fell hard and fast for Kate Bowler. Her writing is naked, elegant, and gripping—she's like a Christian Joan Didion. I left Kate's story feeling more present, more grateful, and a hell of a lot less alone. And what else is art for?"—Glennon Doyle, #1 New York Times bestselling author of *Love Warrior* and president of *Together Rising QI: The Pocket Book of General Ignorance* is an illuminating collection of fun facts, perfect for general knowledge, trivia and pub quiz enthusiasts. This number-one bestseller is a comprehensive catalogue of all the interesting misconceptions, mistakes and misunderstandings in 'common knowledge' that will make you wonder why anyone bothers going to school. Now available in this handy pocket-sized edition, carry it

everywhere to impress your friends, frustrate your enemies and win every argument. Henry VIII had six wives. WRONG! Everest is the highest mountain in the world. WRONG! Alexander Graham Bell invented the telephone. WRONG! QI: The Pocket Book of General Ignorance is the essential set text for everyone who's proud to admit that they don't know everything, and an ideal sack of interesting facts with which to beat people who think they do. Perfect for trivia, pub quiz and general knowledge enthusiasts, this is a number-one bestseller from the authors of The Book of General Ignorance and 1,277 Facts To Blow Your Socks Off, packed with weird, wonderful and really quite interesting facts. This brilliantly simple book on the philosophy known as Asset-Based Thinking, instills success-oriented habits in even the most die-hard cynic. Its transformational lessons--conveyed through unique photographic metaphors and inspiring stories from real people--reveal how the slightest shift in perception can lead to monumental results in both business and in life. ABT is not just positive thinking, but rather a systematic observation of "what works." Kathryn Cramer, an acclaimed corporate consultant, and Hank Wasiak, a creative icon of the advertising industry, have produced a work that looks and works like no other business or self-help book--because it IS like no other book. Change the Way You See Everything is a revolutionary approach to every aspect of life that bears not just reading, but re-reading, and sharing with people in your circle. You'll never look at the world the same way again. From the author of Little Broken Things, a "race-to-the-finish family drama" (People) following a mother who must confront the dark summer that changed her life forever in order to reclaim the daughter she left behind. Juniper Baker had just graduated from high school and was deep in the throes of a summer romance when Cal and Beth Murphy, a childless couple who lived on a neighboring farm, were brutally murdered. When her younger brother became the prime suspect, June's world collapsed and everything she loved that summer fell away. She left, promising never to return to tiny Jericho, Iowa. Until now. Officially, she's back in town to help an ill friend manage the local library. But really, she's returned to repair her relationship with her teenage daughter, who's been raised by Juniper's mother and stepfather since birth--and to solve the infamous Murphy murders once and for all. She knows the key to both lies in the darkest secret of that long-ago summer night, one that's haunted her for nearly fifteen years. As history begins to repeat itself and a dogged local true crime podcaster starts delving into the murders, the race to the truth puts past and present on a dangerous collision course. Juniper lands back in an all-too-familiar place with the answers to everything finally in her sights, but this time it's her daughter's life that hangs in the balance. Will revealing what really happened mean a fresh start? Or will the truth destroy everything Juniper loves for a second time? Baart once again brilliantly weaves mystery into family drama in this expertly-crafted novel for fans of Lisa Jewell and Megan Miranda. "Sixty years later, Jaffe's classic still strikes a chord, this time eerily prescient regarding so many of the circumstances surrounding sexual harassment that paved the way toward the #MeToo movement." - Buzzfeed When Rona Jaffe's superb page-turner was first published in 1958, it changed contemporary fiction forever. Some readers were shocked, but millions more were electrified when they saw themselves reflected in its story of five young employees of a New York publishing company. Almost sixty years later, The Best of Everything remains touchingly--and sometimes hilariously--true to the personal and professional struggles women face in the city. There's Ivy League Caroline, who dreams of graduating from the typing pool to an editor's office; naïve country girl April, who within months of hitting town reinvents herself as the woman every man wants on his arm; and Gregg, the free-spirited actress with a secret yearning for domesticity. Jaffe follows their adventures with intelligence, sympathy, and prose as sharp as a paper cut. From the brains behind the New York Times' bestseller, The Book of General Ignorance comes another wonderful collection of the most outrageous, fascinating, and mind-bending facts, taking on the hugely popular form of the first book in the internationally bestselling series. Just when you thought that it was safe to start showing off again, John Lloyd and John Mitchinson are back with another busload of mistakes and misunderstandings. Here is a new collection of simple, perfectly obvious questions you'll be quite certain you know the answers to. Whether it's history, science, sports, geography, literature, language, medicine, the classics, or common wisdom, you'll be astonished to discover that everything you thought you knew is still hopelessly wrong. For example, do you know who made the first airplane flight? How many legs does an octopus have? How much water should you drink every day? What is the chance of tossing a coin and it landing on heads? What happens if you leave a tooth in a glass of Coke overnight? What is house dust mostly made from? What was the first dishwasher built to do? What color are oranges? Who in the world is most likely to kill you? Whatever your answers to the questions above, you can be sure that everything you think you know is wrong. The Second Book of General Ignorance is the essential text for everyone who knows they don't know everything, and an ideal stick with which to beat people who think they do. Longlisted for the Booker Prize Named a Best Book of the Year By: The New York Times Book Review (Notable Books of the Year) * The New York Public Library * The Washington Post * Time.com * The New York Times Critics' (Parul Seghal's Top Books of the Year) * St. Louis Post Dispatch * Apple * Publisher's Weekly An electrifying novel about beauty, envy, and carelessness from Deborah Levy, author of the Booker Prize finalists Hot Milk and Swimming Home. It is 1988 and Saul Adler, a narcissistic young historian, has been invited to Communist East Berlin to do research; in exchange, he must publish a favorable essay about the German Democratic Republic. As a gift for his translator's sister, a Beatles fanatic who will be his host, Saul's girlfriend will shoot a photograph of him standing in the crosswalk on Abbey Road, an homage to the famous album cover. As he waits for her to arrive, he is grazed by an oncoming car, which changes the trajectory of his life. The Man Who Saw Everything is about the difficulty of seeing ourselves and others clearly. It greets the specters that come back to haunt old and new love, previous and current incarnations of Europe, conscious and unconscious transgressions, and real and imagined betrayals, while investigating the cyclic nature of history and its reinvention by people in power. Here, Levy traverses the vast reaches of the human imagination while artfully blurring sexual and political binaries--feminine and masculine, East and West, past and present--to reveal the full spectrum of our world. In the New York Times bestseller Everything All at Once, Bill Nye shows you how thinking like a nerd is the key to changing yourself and the world around you. Everyone has an inner nerd just waiting to be awakened by the right passion. In Everything All at Once, Bill Nye will help you find yours. With his call to arms, he wants you to examine every detail of the most difficult problems that look unsolvable--that is, until you find the solution. Bill shows you how to develop critical thinking skills and create change, using his "everything all at once" approach that leaves no stone unturned. Whether addressing climate change, the future of our society as a whole, or personal success, or stripping away the mystery of fire walking, there are certain strategies that get results: looking at the world with relentless curiosity, being driven by a desire for a better future, and being willing to take the actions needed to make change happen. He shares how he came to create this approach--starting with his Boy Scout training (it turns out that a practical understanding of science and engineering is immensely helpful in a capsizing canoe) and moving through the lessons he learned as a full-time engineer at Boeing, a stand-up comedian, CEO of The Planetary Society, and, of course, as Bill Nye The Science Guy. This is the story of how Bill Nye became Bill Nye and how he became a champion of change and an advocate of science. It's how he became The Science Guy. Bill teaches us that we have the power to make real change. Join him in... dare we say it... changing the world. Why is the Mona Lisa the most famous painting in the world? Why did Facebook succeed when other social networking sites failed? Did the surge in Iraq really lead to less violence? And does higher pay incentivize people to work harder? If you think the answers to these questions are a matter of common sense, think again. As sociologist and network science pioneer Duncan Watts explains in this provocative book, the explanations that we give for the outcomes that we observe in life--explanations that seem obvious once we know the answer--are less useful than they seem. Watts shows how commonsense reasoning and history conspire to mislead us into thinking that we understand more about the world of human behavior than we do; and in turn, why attempts to predict, manage, or manipulate social and economic systems so often go awry. Only by understanding how and when common sense fails can we improve how we plan for the future, as well as understand the present--an argument that has important implications in politics, business, marketing, and even everyday life. In this instant New York Times bestseller and "multigenerational narrative that's nothing short of brilliant" (People), two sisters'

lives from the 1950s to the present are explored as they struggle to find their places—and be true to themselves—in a rapidly evolving world from #1 New York Times bestselling author Jennifer Weiner. Jo and Bethie Kaufman were born into a world full of promise. Growing up in 1950s Detroit, they live in a perfect “Dick and Jane” house, where their roles in the family are clearly defined. Jo is the tomboy, the bookish rebel with a passion to make the world more fair; Bethie is the pretty, feminine good girl, a would-be star who enjoys the power her beauty confers and dreams of a traditional life. But the truth ends up looking different from what the girls imagined. Jo and Bethie survive traumas and tragedies. As their lives unfold against the background of free love and Vietnam, Woodstock and women’s lib, Bethie becomes an adventure-loving wild child who dives headlong into the counterculture and is up for anything (except settling down). Meanwhile, Jo becomes a proper young mother in Connecticut, a witness to the changing world instead of a participant. Neither woman inhabits the world she dreams of, nor has a life that feels authentic or brings her joy. Is it too late for the women to finally stake a claim on happily ever after? In “her most sprawling and intensely personal novel to date” (Entertainment Weekly), Jennifer Weiner tells a “simply unputdownable” (Good Housekeeping) story of two sisters who, with their different dreams and different paths, offer answers to the question: How should a woman be in the world? The award-winning author of *The Net Delusion* shows how the radical transparency we’ve become accustomed to online may threaten the spirit of real-life democracy. Some people consider crawling along in traffic an opportunity to listen to their favorite music or relax and do their best thinking. For others, traffic is a nightmare that will ruin their entire day. For some, a late appointment is a stressful experience, for others, living in a third-world country without running water is a joyful one. Adversity or opportunity? It depends on your perspective. Tells the story of how women throughout the ages have responded to situations confronting them in daily life by inventing such items as correction fluid, space helmets, and disposable diapers. Think of *Everything* as the peculiar story of M. Tinley, and her queer, conflicted, and beautiful brother, their various addictions and struggles, his eventual death by overdose, and her attempt to understand the life he left her to rebuild. A consultant to some of America’s leading corporations shares key insights and ideas on how to supercharge one’s business and career, explaining how to create and develop new opportunities for wealth in any business, enterprise, or venture. Reprint. 50,000 first printing. What if I could give you a pair of magical glasses that changed the way you saw the world? What if whenever you wore these glasses you felt much better? In fact, let’s say the glasses are powerful enough to turn a bad day into a good day. In fact, they are powerful enough to change despair into hope. And these glasses only cost a few dollars. Interested? Most people would probably want to buy these glasses. The good news for you is that you can! This book can have the same effect as magical glasses, except that it doesn’t work through magic. You will be taught how to be intentional about what you focus on and it will transform the way you feel. The world outside will remain as it is. But what you see there, will be radically different. Your life is actually much better than you think it is. How could I possibly know that about you? This assertion is based on solid research showing that the human mind naturally focuses on negative things. When you focus on the negative things in your life, you are going to feel bad and believe your life is bad. But in reality, there are many good things happening in your life that you just can’t see yet because your attention is directed towards the bad stuff. This is where my magical glasses come in. I’m going to teach you in this book how you can start to see the good that is already in your life. This will cause you to feel much better. In addition, it will give you a more accurate view of reality. The midtwenties through the midthirties can be a time of difficult transition: the security blankets of college and parents are gone, and it’s suddenly time to make far-reaching decisions about career, investments, and adult identity. When author Christine Hassler experienced what she calls the “twenties triangle”, she found that she was not alone. In fact, an entire generation of young women is questioning their choices, unsure if what they’ve been striving for is what they really want. They’re eager to set a new course for their lives, even if that means giving up what they have. Hassler herself left a fast-moving career that wasn’t right for her and instead took the risk of starting her own business. Now, based on her own experience and interviews with hundreds of women, she shares heartfelt stories on issues from career to parents to boyfriends to babies. Yet she also provides practical exercises to enable today’s woman to chart a new direction for her life. *The Lady in the Van* meets *The Unlikely Pilgrimage of Harold Fry* in this uplifting, funny and moving debut novel about a 79-year-old hoarder who is convinced the world is against her. The acclaimed debut novel by the author of *Little Fires Everywhere* and *Our Missing Hearts* “A taut tale of ever deepening and quickening suspense.” —O, the Oprah Magazine “Explosive . . . Both a propulsive mystery and a profound examination of a mixed-race family.” —Entertainment Weekly “Lydia is dead. But they don’t know this yet.” So begins this exquisite novel about a Chinese American family living in 1970s small-town Ohio. Lydia is the favorite child of Marilyn and James Lee, and her parents are determined that she will fulfill the dreams they were unable to pursue. But when Lydia’s body is found in the local lake, the delicate balancing act that has been keeping the Lee family together is destroyed, tumbling them into chaos. A profoundly moving story of family, secrets, and longing, *Everything I Never Told You* is both a gripping page-turner and a sensitive family portrait, uncovering the ways in which mothers and daughters, fathers and sons, and husbands and wives struggle, all their lives, to understand one another. Fast on the heels of the New York Times bestseller *The Book of General Ignorance* comes *The Book of Animal Ignorance*, a fun, fact-filled bestiary that is sure to delight animal lovers everywhere. Arranged alphabetically from aardvark to worm, here are one hundred of the most interesting members of the animal kingdom explained, dissected, and illustrated, with the trademark wit and wisdom of John Lloyd and John Mitchinson. Did you know, for instance, that • when a young albatross takes wing, it may stay aloft for ten years • vampire bat saliva—unsurprisingly, when you think about it—is the source of the world’s most powerful blood thinning drug, appropriately called draculin • bombardier beetles fire a boiling chemical spray out of their rears at 300 pulses per second • a bald eagle’s feathers weigh twice as much as its bones • a giant tortoise recently died at the documented age of 255 • octopuses are dexterous enough to unscrew tops from jars • spider silk is so light that a strand long enough to circle the world would weigh as much as a bar of soap? So meet the water bears that can live in suspension for hundreds of years, the parasite carried by your cat that makes men grumpy and women promiscuous, and the woodlouse that drinks through its bottom. Marvel at elephants that walk on tiptoe, pigs that shine in the dark, and woodpeckers that have ears on the ends of their tongues. If you still think a pangolin is a musical instrument, that hyenas are dogs, or that sheep are pointless and stupid, *The Book of Animal Ignorance* has arrived just in time.
