In a time of globalization, what does an inclusive feminist politics entail? This accessible volume addresses the key issues in, and most significant challenges for, contemporary transnational feminist politics and political theory. Ideal for courses in Gender and Globalization, Transnational Feminism and Feminist Theory. This book takes an intersectional, interdisciplinary, and transnational approach, presenting work that will provide the reader with a nuanced and in-depth understanding of the role of globalization in the sexual and reproductive lives of gendered bodies in the 21st century. *Reproductive Justice and Sexual Rights: Transnational Perspectives* draws on reproductive justice and transnational feminism as frameworks to explore and make sense of the reproductive and sexual experiences of various groups of women and marginalized people around the world. Interactions between globalization, feminism, reproductive justice, and sexual rights are explored within human rights and transnational feminist paradigms. This book includes case studies from Mexico, Ireland, Uganda, Colombia, Taiwan, and the United States. The edited collection presented here is intended to provide academics and students with a challenging and thought-provoking look into sexual and reproductive health matters from across the globe. In this way, the work presented in this volume will help the reader understand their own reproductive and

sexual experiences in a more nuanced and contextualized way that links individuals and communities to each other in a quest for justice and liberation. First published in 2000. This book takes a transnational feminist approach to the literature of three contemporary women authors, Virginia Woolf, Alice Walker, and South African writer Zoe Wicomb. The author draws from post-colonial studies and considers how gender collides with race, national origin, and class in women's oppression. The Zina Ordinance is part of the Haddood Ordinances that were promulgated in 1979 by the military dictator General Zia-ul-Haq, self-proclaimed president of Pakistan. Since then, tens of thousands of Pakistani women have been charged and incarcerated under the ordinance, which governs illicit sex. Shahnaz Khan argues that the zina laws help situate morality within the individual, thus de-emphasizing the prevalence of societal injustice. She also examines the production and reception of knowledge in the west about women in the third world and concludes that transnational feminist solidarity can challenge oppressive practices internationally. *Transnational Feminist Itineraries* demonstrates the key contributions of transnational feminist theory and practice to analyzing and contesting authoritarian nationalism and the extension of global corporate power. Scholars of social movements tend to overlook the achievements and political significance of women's movements. Through theoretical discussions and empirical examples, *Solidarities Beyond Borders* demonstrates the creativity and dynamism of transnational feminist and women's groups around the world. These timely case studies from North America, Latin America, and Southeast Asia explore the benefits

and challenges of extending ties beyond national borders and disciplinary boundaries. The contributors not only bring to light the opportunities and challenges that globalization poses for transnationalizing women's movements, they offer important strategic, conceptual, and methodological lessons for all social movements. *Women's Journey to Empowerment in the 21st Century* offers a global view into the patriarchal attitudes that shape cultural practices that oppress women and continue to take form in the modern era. In closely examining a range of issues--from the college campus rape epidemic in the United States to the climate change effects in Ghana--this book compels readers to utilize a contextual framework in order to take a closer look into contemporary violence and oppression against women in our world. Written through the lens of transnational feminism, it examines the intersections of nationhood, race, gender, sexuality, and economics within the context of a world shaped by globalization and colonialism, causing the redefinition of borders and the realignment of migration patterns. A transnational feminist perspective also supports a definition of global sisterhood based on equity, understanding, and mutual experiences. Students focusing on social justice, social work, women's studies, feminist theory, and/or violence against women will find the book to be an invaluable resource. New readings offer insights into the opportunities and limitations offered by cyberspace, ideas of domesticity and the public/private split within politics and culture. Other topics include women's health, disability, citizenship and nationalism. A collection of speeches and writings by political activist Angela Davis which address the political and social

changes of the past decade as they are concerned with the struggle for racial, sexual, and economic equality. An examination of nationalism and gender. 'Just Advocacy?' sheds light on the often overlooked ways that women and children are further subjugated when political or humanitarian groups represent them solely as victims and portray the individuals that are helping them as paternal saviours. Investigates the theory and practice of transnational feminist approaches to scholarship and activism. Transnational feminism has been critical to feminist theorizing in the global North over the last few decades. Perhaps due to its broad terminology, transnational feminism can become vague and dislocated, losing its ability to name specific critiques of and responses to empire, race, and globalization that are emboldened by its transnational remit. This volume encompasses an expansive engagement and exploration of transnational South Asian feminist movements, networks, and critiques within the context of the popular and the diaspora in South Asia. The contributing authors address key issues in a global context, especially as they operate both in a situated and the diasporic imaginary of South Asia. While the idea of the popular in South Asia has often been circumscribed by the spaces and cultural politics of Bollywood, this interdisciplinary volume takes an innovative turn to examine how academics, advocates, activists, and artists envision the inroads and consequences of nationalism, globalization and/or empire, which continually remake communities and alter needs and allegiances. Through ethnography, literature, dance, cinema, activism, poetry, and storytelling, the authors analyse popular and social justice using a focused,

multidisciplinary gendered lens. This book was originally published as a special issue of *South Asian Popular Culture*. *Women's Activism and "Second Wave" Feminism* situates late 20th century feminisms within a global framework of women's activism. Its chapters, written by leading international scholars, demonstrate how issues of heterogeneity, transnationalism, and intersectionality have transformed understandings of historical feminism. It is no longer possible to imagine that feminism has ever fostered an unproblematic sisterhood among women blind to race, ethnicity, class, sexuality, nationality and citizenship status. The chapters in this collection modify the "wave" metaphor in some cases and in others re-periodize it. By studying individual movements, they collectively address several themes that advance our understandings of the history of feminism, such as the rejection of "hegemonic" feminism by marginalized feminist groups, transnational linkages among women's organizations, transnational flows of ideas and transnational migration. By analyzing practical activism, the chapters in this volume produce new ways of theorizing feminism and new historical perspectives about the activist locations from which feminist politics emerged. Including histories of feminisms in the United States, Canada, South Africa, India, France, Russia, Japan, Korea, Poland and Chile, *Women's Activism and "Second Wave" Feminism* provides a truly global re-appraisal of women's movements in the late 20th century. Contemporary feminists are used to juggling many different identities at once, balancing affiliations based on race, nation, class, and sexuality. First-wave feminists also negotiated—or failed to negotiate—similar tensions in their international

organizing. Using primary documents dating from the abolitionist movement to the Second World War, Maureen Moynagh and Nancy Forestell investigate the tensions inherent in organizing early transnational feminist movements. *Documenting First Wave Feminisms: Volume 1* provides a historical framework to bring together voices of women both canonical and less well known, from Mary Wollstonecraft to Mabel Dove, who were active in feminist movements in all corners of the world. Suffrage, imperialism, citizenship, sexuality, and moral reform are shown to be key issues in a variety of exchanges across North America, Europe, the global south, and the Pan-Pacific region. This source book is as nuanced as first-wave feminism itself and will prove a valuable resource for studying women's rights in an increasingly globalized world. This study demonstrates that recognizing the differences of the women activists promoting disparate agendas leads to a fuller appreciation of the connections and commonalities in the relations among those involved.

*Transnational Feminism and Women's Movements in Post-1997 Hong Kong: Solidarity Beyond the State* is the first comprehensive account of feminism and women's movements in Hong Kong. The unique geographical, historical and cultural situation of the city provides the backdrop for Adelyn Lim to bring diverse groups of activists organizing socially disadvantaged and disaffected women, many of whom originating from Mainland China or South and Southeast Asia, to the foreground. Feminism, Lim argues, is not premised on a collective identity; it should rather be understood as a collective frame of action. The book begins with a critical history of women's mobilization during the British colonial period and the lead

up to governance under the People's Republic of China. Subsequent chapters discuss the organizational forms, rhetoric, and strategies of women's groups in addressing the feminization of poverty, engagement with state institutions, violence against women, prostitution, and domestic work. Conflicts between feminist ideals and the realities and demands of the sociopolitical environment are thrown into sharp relief. The empirical analysis makes a case for Hong Kong to be considered a prime site to challenge and renew the theorizing of transnational feminism. "In this well written monograph, Adelyn Lim explores the multiple forms of women's activism in the tense political environment of post-1997 Hong Kong. Using feminist theory and social movement scholarship, she explores processes of framing social action and building coalitions in a context where unresolved conflicts abound. The result is a rich portrait of activism in one of the world's most globalized cities." —Andrew Kipnis, author of *China and Postsocialist Anthropology: Theorizing Power and Society after Communism* "A book about Hong Kong feminisms that manages to be both sweeping and intimate, with through-lines of historical and political context seamlessly interwoven with details of activist identities and commitments. Lim skillfully connects feminist and social movement theory with movement praxis to develop a compelling account of local feminist organizing situated in a clear transnational context." —Sharon Wesoky, author of *Chinese Feminism Faces Globalization* This book traces the development of feminist consciousness in Japan from 1871 to 1941. Taeko Shibahara uncovers some fascinating histories as she examines how middle-class women navigated between

domestic and international influences to form ideologies and strategies for reform. They negotiated a humanitarian space as Japan expanded its nationalist, militarist, imperialist, and patriarchal power. Focusing on these women's political awakening and activism, Shibahara shows how Japanese feminists channeled and adapted ideas selected from international movements and from interactions with mainly American social activists. *Japanese Women and the Transnational Feminist Movement before World War II* also connects the development of international contacts with the particular contributions of Ichikawa Fusae to the suffrage movement, Ishimoto Shidzue to the birth control movement, and Gauntlett Tsune to the peace movement by touching on issues of poverty, prostitution, and temperance. The result provides a window through which to view the Japanese women's rights movement with a broader perspective. Increasingly feminists around the world have successfully campaigned for recognition of women's full personhood and empowerment. *Global Feminism* explores the social and political developments that have energized this movement. Drawn from an international group of scholars and activists, the authors of these original essays assess both the opportunities that transnationalism has created and the tensions it has inadvertently fostered. By focusing on both the local and global struggles of today's feminist activists this important volume reveals much about women's changing rights, treatment and impact in the global world. Contributors: Melinda Adams, Aida Bagic, Yakin Ertürk, Myra Marx Ferree, Amy G. Mazur, Dorothy E. McBride, Hilikka Pietilä, Tetyana Pudrovska, Margaret Snyder, Sarah Swider, Aili Mari Tripp, Nira Yuval-Davis.

Transnational Borderlands: The Making of Cultural Resistance in Women's Global Networks investigates the implications of transnational feminist methodologies at multiple levels: collective actions, theory, pedagogy, discursive, and visual productions. It addresses a substantial gap in the field of transnational feminisms; namely, the absence of a voice that links social and theoretical outcomes to the politics of representation in literature, visual art, discourses of rights and citizenships, and pedagogy. The book encompasses three categories of relevance to contemporary transnational methodologies: the politics of cultural representation in literature and visual art, the de-centering of human/women's rights, and pedagogies of crossing and dissent. Given current interest in the cultures of globalization and the role women and other minorities play in them, we expect this book will appeal to scholars in the fields of Women's and Gender Studies, Borderlands Studies, Transnational Studies, and to anyone interested in how transnational processes shape a culture of resistance in women's global networks. This ethnographic study examines the transnational relations among feminist movements at the end of the twentieth century, exploring two differently situated women's organizations in the Northeast Brazilian state of Pernambuco. The conventional narrative of globalization tells the story of inexorable forces beyond the capacity of individuals to mute or transcend. But this study tells a different story, one of social actors purposefully weaving cross-border relationships. From this vantage point, global social forces are not immaculately conceived. Instead, they are constituted by human actors with their own interests and identities, located in particular social

contexts. *Making Transnational Feminism* takes what some have called "global civil society" as its object, moving beyond both dire predictions and euphoric celebrations to understand how transnational political relationships are constructed and sustained across social and geographical divides. It also provides a compelling case study for use in advanced undergraduate and graduate courses in globalization, gender studies, and social movements. The acceleration of economic globalization and the rapid global flows of people, culture, and information have intensified the importance of developing transnational understandings of contemporary issues. Transnational feminist perspectives have provided a unique outlook on women's lives and have deepened our understanding of the gendered nature of global processes. *Transnational Feminism in the United States* examines how transnational perspectives shape the ways in which we create and disseminate knowledge about the world within the United States, and how the paradigm of transnational feminism is affected by national narratives and public discourses within the country itself. An innovative theoretical project that is both deconstructive and constructive, this book interrogates the limits of feminist thought, primarily through case studies that illustrate its power to create new fields of research out of traditionally interdisciplinary lines of inquiry. Leela Fernandes discusses ways to approach, analyze, and capture processes that exceed and unsettle the nation-state within the transnational feminist paradigm. Examining the links between power and knowledge that bind interdisciplinary theory and research, she shines new light on issues such as human rights as well as academic

debates about transnational feminist perspectives on global issues. A thought-provoking analysis, *Transnational Feminism in the United States* powerfully contributes to the field of Women's Studies and related cross-disciplinary scholarship on feminist theory and gender from a global perspective. "Despite sharing many successes at promoting international collaboration, enabling effective responses to politically powerful states, increasing awareness of formerly invisible violations of the human rights of women, and gaining ground in many countries and in international law, women's human rights activists have many differences among them-in resources, location, issue-focus and strategies. It is appropriate to pay attention to these differences, particularly as they create challenges to the movement for women's rights. However, we argue that the women's human rights discourse-as developed and deployed by women's human rights activists-can be a resource for addressing these challenges internal to the movement while facing current challenges from outside the movement. Attentive to the politics of defining a movement and its spokespeople, the article includes an extensive methodological discussion. We arrive at our conclusions after observing a broad range of women's activism and interpreting the reflections of a wide range of activists. Taken together, they offer a view of human rights as indivisible and of the rights of all humans as interrelated. This view is useful for self-reflection within women's movements and for the ability of participants of various women's movements to use the women's human rights framework for meeting contemporary challenges."--Abstract Winner of the Victoria Schuck award given by the American Political Science

Association and an Honorable Mention in the Distinguished Book Award given by the Political Economy of World Systems section of the American Sociological Association. Globalization may offer modern feminism its greatest opportunity and greatest challenge. Allowing communication and information exchange while also exacerbating economic and social inequalities, globalization has fostered the growth of transnational feminist networks (TFNs). These groups have used the Internet to build coalitions, lobby governments, and advance the goals of feminism. *Globalizing Women* explains how the negative and positive aspects of globalization have helped to create transnational networks of activists and organizations with common agendas. Sociologist Valentine M. Moghadam discusses six such feminist networks to analyze the organization, objectives, programs, and outcomes of these groups in their effort to improve conditions for women throughout the world. Moghadam also examines how "globalizing women" are responding to and resisting growing inequalities, the exploitation of female labor, and patriarchal fundamentalisms. This book is an important addition to literature exploring feminism as well as to the broader discussion of the impact of transnational social movements and organizations in the globalized world. This book offers a transnational feminist response to the gender politics of torture and terror from the viewpoint of populations of color who have come to be associated with acts of terror. Using the War on Terror in Afghanistan and Iraq, this book revisits other such racialized wars in Palestine, Guatemala, India, Algeria, and South Africa. It draws widely on postcolonial literature, photography,

films, music, interdisciplinary arts, media/new media, and activism, joining the larger conversation about human rights by addressing the problem of a pervasive public misunderstanding of terrorism conditioned by a foreign and domestic policy perspective. Deb provides an alternative understanding of terrorism as revolutionary dissent against injustice through a postcolonial/transnational lens. The volume brings counter-terror narratives into dialogue with ideologies of gender, race, ethnicity, nationality, class, and religion, addressing the situation of women as both perpetrators and targets of torture, and the possibilities of a dialogue between feminist and queer politics to confront securitized regimes of torture. This book explores the relationship in which social and cultural texts stand with respect to legacies of colonialism and neo-imperialism in a world of transnational feminist solidarities against postcolonial wars on terror. *Transnational Feminist Itineraries* brings together scholars and activists from multiple continents to demonstrate the ongoing importance of transnational feminist theory in challenging neoliberal globalization and the rise of authoritarian nationalisms around the world. The contributors illuminate transnational feminism's unique constellation of elements: its specific mode of thinking across scales, its historical understanding of identity categories, and its expansive imagining of solidarity based on difference rather than similarity. Contesting the idea that transnational feminism works in opposition to other approaches—especially intersectional and decolonial feminisms—this volume instead argues for their complementarity. Throughout, the contributors call for reaching across social, ideological, and geographical

boundaries to better confront the growing reach of nationalism, authoritarianism, and religious and economic fundamentalism. Contributors: Mary Bernstein, Isabel Maria Cortesão Casimiro, Rafael de la Dehesa, Carmen L. Diaz Alba, Inderpal Grewal, Cricket Keating, Amy Lind, Laura L. Lovett, Kathryn Moeller, Nancy A. Naples, Jennifer C. Nash, Amrita Pande, Srila Roy, Cara K. Snyder, Ashwini Tambe, Millie Thayer, Catarina Casimiro Trindade This collection of interdisciplinary essays examines current cinematic and media landscapes from the perspective of transnational feminist practices and methodologies. Focusing on film, media art, and video essays, the contributors chart innovative strategies for exploring contemporary visual cultures. For the first time in the literary tradition, the contemporary woman's historical novel (post-1970) is surveyed from a transnational feminist perspective. Analyzing the maternal (the genre's central theme) reveals that historical fiction is a transnational feminist means for challenging historical erasures, silences, normative sexuality, political exclusion, and divisions of labor. (Series: Contributions to Transnational Feminism - Vol. 5) This study argues that the private homes in transnational women's fiction reflect public legacies of colonialism. Published in Australia, Canada, India, Nigeria, Puerto Rico and the United States between 1995 and 2005, the novels use fictional houses to criticize and unsettle home and homeland, depicting their linked oppressions and exclusions. This thoroughly updated edition provides a comprehensive overview of two centuries of transnational feminist efforts to produce a more just global order. Mary Hawkesworth explores how social, economic, and political inequalities between men

and women of different races, classes, ethnicities, and nationalities have been transformed over two centuries of globalization. Drawing on historical and contemporary examples, she demonstrates how women have forged international networks and alliances to address specific women's issues beyond the borders of the nation-state, crafting policies to mitigate pressing abuses and devising alternatives to liberal and neo-liberal agendas. The book considers innovative feminist tactics to produce global change, carefully tracing the structural forces that constrain transnational feminist activism. Hawkesworth illuminates the complexity of feminist strategies to influence international agencies and foundations, national governments, and transnational NGOs. By providing critical new insights into the gendered nature of the global system and the gendered dynamics of international institutions and nation states, this work will be invaluable for all those engaged in the interdisciplinary fields of globalization studies and feminist studies. The Oxford Handbook of Transnational Feminist Movements explores the historical, political, economic and social contexts in which transnational feminist movements have emerged and spread, and the contributions they have made to global knowledge, power and social change over the past half century. The publication of the handbook in 2015 marks the fortieth anniversary of the United Nations International Women's Year, the thirtieth anniversary of the Third World Conference on Women held in Nairobi, the twentieth anniversary of the Beijing Declaration and Platform for Action, and the fifteenth anniversaries of the Millennium Development Goals and of UN Security Council Resolution 1325 on 'women, peace and security'. The

editors and contributors critically interrogate transnational feminist movements from a broad spectrum of locations in the global South and North: feminist organizations and networks at all levels (local, national, regional, global and 'glocal'); wider civil society organizations and networks; governmental and multilateral agencies; and academic and research institutions, among others. The handbook reflects candidly on what we have learned about transnational feminist movements. What are the different spaces from which transnational feminisms have operated and in what ways? How have they contributed to our understanding of the myriad formal and informal ways in which gendered power relations define and inform everyday life? To what extent have they destabilized or transformed the global hegemonic systems that constitute patriarchy? From a position of fifty years of knowledge production, activism, working with institutions, and critical reflection, the handbook recognizes that transnational feminist movements form a key epistemic community that can inspire and provide leadership in shaping political spaces and institutions at all levels, and transforming international political economy, development and peace processes. The handbook is organized into ten sections, each beginning with an introduction by the editors. The sections explore the main themes that have emerged from transnational feminist movements: knowledge, theory and praxis; organizing for change; body politics, health and well-being; human rights and human security; economic and social justice; citizenship and statebuilding; militarism and religious fundamentalisms; peace movements, UNSCR 1325 and postconflict rebuilding; feminist political ecology; and digital-age transformations and future trajectories.

It also provides a compelling case study for use in advanced undergraduate and graduate courses in globalization, gender studies, and social movements. "Develops a genuinely anti-imperialist feminism. Against relativism/universalism debates that ask feminists to either reject normativity or reduce feminism to a Western conceit, Khader's nonideal universalism rediscovers the normative core of feminism in opposition to sexist oppression and reimagines the role of moral ideals in transnational feminist praxis"-- This text with readings provides an accessible and engaging introduction to issues faced by women around the world. Each chapter begins with a framework essay written by a feminist scholar in the field, which provides an overview and analytical structure for the issues related to the topic at

hand. The framework essay includes learning activities and other sidebars that may help instructors in planning class sessions and will encourage students to explore issues further. A number of carefully selected readings in each chapter offer a wide variety of perspectives on the topics discussed. Few of these essays have been anthologized elsewhere, providing new material for instructors and students. *Women and War in the Middle East* provides a critical examination of the relationship between gender and transnationalism in the context of war, peace-building and post-conflict reconstruction in the Middle East. Critically examining the ways in which the actions of various local and transnational groups - including women's movements, diaspora communities, national governments, non-governmental actors and multilateral bodies - interact to both intentionally and inadvertently shape the experiences of women in conflict situations, and determine the possibilities for women's participation in peace-building and (post)-conflict reconstruction, as well as the longer-term prospects for peace and security. The volume pays particular attention to the ways in which gender roles, relations and identities are constructed, negotiated and employed within transnational social and political fields in the conflict and post-conflict situations, and their particular consequences for women. Contributions focus on the two countries with the longest experiences of war and conflict in the Middle East, and which have been subject to the most prominent international interventions of recent years - that is, Iraq and the Occupied Palestinian Territories. Issues addressed by contributors include the impact of gender mainstreaming measures by international agencies and

NGOs upon the ability of women to participate in peace-building and post-conflict resolution; the consequences for gender relations and identities of the US-led invasion and occupation of Iraq; and how transnational feminist movements can most effectively support peace building and women's rights in the region. Based entirely on original empirical research. *Women and War in the Middle East* brings together some of the foremost scholars in the areas of feminist international relations, feminist international political economy, anthropology, sociology, history and Middle East studies. Extrait de la couverture : " 'Those of us who take intellectual production as a site for politics badly need the kind of profound and sophisticated thinking that went into this collection... The pleasures of this text are rare multiple : it reminds us that critique can be an act of creation and alliance ; it opens up needful conversations ; it establishes the difference between understanding what it means to refer to the global without mistaking it for all that there is.' - Wahneema Lubiano, Princeton University." Following a long historical legacy, Muslim women's lives continue to be represented and circulate widely as a vehicle of intercultural understanding within a context of the "war on terror." Following Edward Said's thesis that these cultural forms reflect and participate in the power plays of empire, this volume examines the popular and widespread production and reception of Muslim women's lives and narratives in literature, poetry, cinema, television and popular culture within the politics of a post-9/11 world. This edited collection provides a timely exploration into the pedagogical and ethical possibilities opened up by transnational, feminist, and anti-colonial readings that can

work against sensationalized and stereotypical representations of Muslim women. It addresses the gap in contemporary theoretical discourse amongst educators teaching literary and cultural texts by and about Muslim Women, and brings scholars from the fields of education, literary and cultural studies, and Muslim women's studies to examine the politics and ethics of transnational anti-colonial reading practices and pedagogy. The book features interviews with Muslim women artists and cultural producers who provide engaging reflections on the transformative role of the arts as a form of critical public pedagogy.
