This collected volume brings together the contributions of several humanities scholars who focus on the evolution of language in the digital era. The first part of the volume explores general aspects of humanities and linguistics in the digital environment. The second part focuses on language and translation and includes topics that discuss the digital translation policy, new technologies and specialised translation, online resources for terminology management, translation of online advertising, or subtitling. The last part of the book focuses on language teaching and learning and addresses the changes, challenges and perspectives of didactics in the age of technology. Each contribution is divided into several sections that present the state of the art and the methodology used, and discuss the results and perspectives of the authors. The book is recommended to scholars, professionals, students and anyone interested in the changes within the humanities in conjunction with technological innovation or in the ways language is adapting to the challenges of today's digitized world. Riding on the success of 3D cinema blockbusters and advances in stereoscopic display technology, 3D video applications have gathered momentum in recent years. 3D-TV System with Depth-Image-Based Rendering: Architectures, Techniques and Challenges surveys depth-image-based 3D-TV systems, which are expected to be put into applications in the near future. Depth-image-based rendering (DIBR) significantly enhances the 3D visual experience compared to stereoscopic systems currently in use. DIBR techniques make it possible to generate additional viewpoints using 3D warping techniques to adjust the perceived depth of stereoscopic videos and provide for auto-stereoscopic displays that do not require glasses for viewing the 3D image. The material includes a technical review and literature survey of components and complete systems, solutions for technical issues, and implementation of prototypes. The book is organized into four sections: System Overview, Content Generation, Data Compression and Transmission, and 3D Visualization and Quality Assessment. This book will benefit researchers, developers, engineers, and innovators, as well as advanced undergraduate and graduate students working in relevant areas. This document brings together a set of latest data points and publicly available information relevant for Manufacturing Industry. We are very excited to share this content and believe that readers will benefit from this periodic publication immensely. The World Trade Organization (WTO) is an intergovernmental Organization that regulates international trade. The WTO officially commenced on 1 January 1995 under the Marrakesh Agreement, signed by 123 nations on 15 April 1994, replacing the General Agreement on Tariffs and Trade (GATT), which commenced in 1948. It is the largest international economic Organization in the world. The WTO deals with regulation of trade in goods, services and intellectual property between participating countries by providing a framework for negotiating trade agreements and a dispute resolution process aimed at enforcing participants' adherence to WTO agreements, which are signed by representatives of member governments and ratified by their parliaments. Most of the issues that the WTO focuses on derive from previous trade negotiations, especially from the Uruguay Round (1986-1994). The present book is a result of deep research conducted on the topic of World Trade Organization. It is in continuation to the earlier works by the author on the contemporary trends of WTO with special emphasis laid on the politics of regional trading blocs in this book. The ever expanding consensus on the co-existence of politics and economics is evident from the treatment of the topic on WTO. The book thus unfolds the deficiencies and imbalances witnessed under the WTO system, and points to the critical choices to be made by the member nations of WTO in future negotiations. If you are involved in running a business and are beginning to wonder when you should start looking into branding (how does it work, anyway?), brace yourself... According to Jacky Tai and Wilson Chew, you should have started your branding exercise yesterday! This book distills the authors' wealth of experience in grappling with branding strategies in the real world into a practical and easy-to-understand guide for everyone involved in branding. Revised from the 2007 bestseller, Transforming Your Business Into A Brand, this updated branding manual will show you just how a business becomes a brand. The following analysis illustrates the underlying trends and relationships of U.S. issued patents of the subject company. The analysis employs two frequently used patent classification methods: US Patent Classification (UPC) and International Patent Classification (IPC). Aside from assisting patent examiners in determining the field of search for newly submitted patent applications, the two classification methods play a pivotal role in the characterization and analysis of technologies contained in collections of patent data. The analysis also includes the company's most prolific inventors, top cited patents as well as foreign filings by technology area. "I can't remember the last time I read a book that was more fascinating and useful and enjoyable."—Bill Bryson Reduce your carbon footprint and understand the issue with this "up-to-date life guide for carbon-conscious

readers.”—Kirkus Calculate your carbon footprint: with an item-by-item breakdown. Meet your company’s carbon goals: using the latest research. Covid-19 and the carbon battle: understand the new global supply chain. The Carbon Footprint of Everything breaks items down by the amount of carbon they produce, creating a calorie guide for the carbon-conscious. With engaging writing, leading carbon expert Mike Berners-Lee shares new carbon calculations based on recent research. He considers the impact of the pandemic on the carbon battle—especially the embattled global supply chain—and adds items we didn’t consider a decade ago, like bitcoin and other cryptocurrencies. Supported by solid research, cross-referenced with other expert sources, illustrated with easy-to-follow charts and graphs, and written with Berners-Lee’s trademark sense of humor, The Carbon Footprint of Everything should be on everyone’s bookshelf. The Carbon Footprint of Everything is an extensively revised and updated edition of How Bad Are Bananas. These proceedings represent the work of contributors to the 16th International Conference on Cyber Warfare and Security (ICCCWS 2021), hosted by joint collaboration of Tennessee Tech Cybersecurity Education, Research and Outreach Center (CEROC), Computer Science department and the Oak Ridge National Laboratory, Tennessee on 25-26 February 2021. The Conference Co-Chairs are Dr. Juan Lopez Jr, Oak Ridge National Laboratory, Tennessee, and Dr. Ambareen Siraj, Tennessee Tech’s Cybersecurity Education, Research and Outreach Center (CEROC), and the Program Chair is Dr. Kalyan Perumalla, from Oak Ridge National Laboratory, Tennessee. Michael Nnaji is young, affable and extremely brilliant, but still struggling. He dedicates the entirety of his life to ecclesiastical service, and the anointing upon his life is a major source of blessing to many that come across to him. However, anointing without money is an annoyance, so his superior in the church, Pastor Kunle Martins orchestrates a multi-million dollar deal that requires his information and communication technology expertise, which will certainly, make him rich stupendously. He rejects the juicy offer bluntly, and upholds the tenet of his faith while Pastor Martins goes raving mad at him, and presents him with a choice: either to accept the crooked, rich proposition or spend his whole life, languishing in gaol. Michael prays ardently for divine intervention to be let off the hook but quite unfortunate, the charge against him is very grievous, and he needs a rapid and effective legal service which he can’t really afford to be freed from a damnable incarceration. The young pastor hopes for a miracle to get that, and one just wonders the possibility of it. An absolute expose` of the ills venerated personalities perpetrate in the contemporary African society. Earth Day celebrates our beautiful planet and calls us to act on its behalf. Some people spend the day planting flowers or trees. Others organize neighborhood clean-ups, go on nature walks, or make recycled crafts. Readers will discover how a shared holiday can have multiple traditions and be celebrated in all sorts of ways. Está chegando aquela época em que as emoções se exaltam. Para o bem ou para o mal, toda Copa do Mundo atira a adrenalina dos brasileiros, especialmente nos dias de jogos. E a Copa 2022 não será diferente, a não ser pelo fato de que a tecnologia também vai entrar em campo. Serão várias câmeras – algumas de resolução 8K – espalhadas pelos estádios do Qatar, enviando ao mundo inteiro imagens com uma qualidade que nunca se viu até hoje num evento ao vivo. E, nas casas dos torcedores (pelo menos grande parte deles), as imagens exibidas também terão brilho, contraste e profundidade inéditos. Gizmos or: The Electronic Imperative offers a concise series of analyses on the transformative impact of digital devices on American society. With approaches ranging from semiotic theory to psychoanalytic theory, sociological theory to personal reflection, Berger taps the span of knowledge from his prolific career to help readers better understand the role digital devices play both in their technologic, economic, and common-use forms. Using accessible, conversational language and numerous illustrations, Berger deconstructs familiar objects and media for readers ranging from field specialists to everyday cultural consumers alike. This book deals with the various ways Netflix reconceptualises television as part of the process of TV IV. As television continues to undergo a myriad of significant changes, Netflix has proven itself to be the dominant force in this development, simultaneously driving a number of these changes and challenging television’s existing institutional structures. This comprehensive study explores the pre-history of Netflix, the role of binge-watching in its organisation and marketing, and Netflix’s position as a transnational broadcaster. It also examines different concepts of control and the role these play in the history of ancillary technologies, from the remote control to binge-watching as Netflix’s iteration of giving control to the viewers. By focusing on Netflix’s relationship with the linear television schedule, its negotiations of quality and marketing, as well as the way Netflix integrates into national media systems, Netflix and the Re-invention of Television illuminates the importance of Netflix’s role within the processes of TV IV. Charts and tables. Brazil, Russia, India, and China (BRIC) are among the largest and fastest-growing economies in the world. The enormous size of the customer base in these emerging markets is the strategic concern of global business firms. Successful market performance in these markets requires sound understanding of dynamic environmental factors and timely investme This book highlights state-of-the-art research on big data and the Internet of Things (IoT), along with related areas to ensure efficient and Internet-compatible IoT systems. It not only discusses big data security and privacy challenges, but also energy-efficient approaches to improving virtual machine placement in cloud computing environments. Big data and the Internet of Things (IoT) are ultimately two sides of the same coin, yet extracting, analyzing and managing IoT data poses a serious challenge. Accordingly, proper analytics infrastructures/platforms should be used to analyze IoT data. Information technology (IT) allows people to upload, retrieve, store and collect information, which ultimately forms big data. The use of big data analytics has grown tremendously in just the past few years. At the same time, the IoT has entered the public consciousness, sparking people’s imaginations as to what a fully connected world can offer. Further, the book discusses the analysis of real-time big data to derive actionable intelligence in enterprise applications in several domains, such as in industry and agriculture. It explores possible automated solutions in daily life, including structures for smart cities and automated home systems based on IoT technology, as well as health care systems that manage large amounts of data (big data) to improve clinical decisions. The book addresses the security and privacy of the IoT and big data technologies, while also revealing the impact of IoT technologies on several scenarios in smart cities design. Intended as a comprehensive introduction, it offers in-depth analysis and provides scientists, engineers and professionals the latest techniques, frameworks and strategies used in IoT and big data technologies. JAMES BEARD AWARD NOMINEE • A stylish, transporting pasta master class from New York City’s premier pasta chef, with recipes for 40 handmade pasta shapes and 100 Italian American, regional Italian, and modern dishes IACP AWARD FINALIST • “Missy Robbins brings her extraordinary knowledge and generous heart to teach us to prepare the pastas that made her restaurants, Lilia and Misi, two of the best in the world.”—Ina Garten, Barefoot Contessa ONE OF THE TEN BEST COOKBOOKS OF THE YEAR: San Francisco Chronicle, Boston Globe • ONE OF THE BEST COOKBOOKS OF THE YEAR: Minneapolis Star Tribune, Glamour, Food52, Epicurious Food trends come and go, but pasta holds strong year after year. Despite its humble ingredients—made of merely flour and water or flour and eggs—the magic, rituals, and art of pasta making span over five centuries. Two ingredients are turned into hundreds of stuffed, rolled, extruded, dried, stamped, and hand-cut shapes, each with its own unique provenance and enrobed in a favored sauce. New York City chef Missy Robbins fell in love with Italian food and pasta twenty-five years ago. She has been cooking, researching, and studying her way across Italy ever since, which led her to open two of America’s most renowned pasta restaurants, Lilia and Misi. With illustrated step-by-step recipes for handmaking forty of the most versatile pasta shapes and one hundred recipes for Italian American, regional Italian, and Robbins’s own best pasta dishes, plus two dozen vegetable sides, this is the hard-working manual for home cooks who aspire to master the art of pasta cooking. Whether making pasta sheets for lasagna or stamping out pasta “coins” for Corzetti with Goat Cheese and Asparagus—or even buying handmade pasta to make Tagliatelle with Porcini, Rosemary, and Garlic—Robbins provides all the inspiration, instruction, and encouragement required to make pasta exceptionally well. Evocatively photographed with nearly 100 full-color mouthwatering photos of pasta dishes and twenty images from Italy, this is a richly illustrated ode to the ingredients, recipes, and craft that have made pasta the most popular fare of a beloved cuisine. For most countries, economic development involves ‘catching up’ with leading countries. This needs more than physical assets and labour: it requires technological capabilities, educational attainment, entrepreneurship, and development of the necessary institutional infrastructure, including intellectual property rights, particularly patents. “The book is one of the most comprehensive overviews ever written on the key aspects of chemical vapour deposition processes and it is more comprehensive, technically detailed and up-to-date than other books on CVD. The contributing authors are all practising CVD technologists and are leading international experts in the field of CVD. It presents a logical and progressive overview of the various aspects of CVD processes. Basic concepts, such as the various types of CVD processes, the design of CVD reactors, reaction modelling and CVD precursor chemistry are covered in the first few”—BOOK JACKET. It is all pervasive, a part of everyone's job description. Marketing is an expression of a company's character, and is a responsibility that necessarily belongs to the whole company and everyone in it. Personal computing is changing from an old world of local services provided by local devices to a new world of remote Web-based services provided by cloud computing-based data centres. This book explores in detail what might be required to make a comprehensive move to this exciting new world and the many benefits that move could bring. The Design Book brings together the best in contemporary design for the home, presenting a huge range of striking new products: tables and chairs, sofas and beds, storage, kitchens and bathrooms, tableware, textiles and surfaces, lighting, electronics and more. Works by the finest international talents, including Shin and Tomoko Azumi, Sebastian Bergne, Ronan and Erwan Bouroullec, Fernando and Humberto Campana, Piet Hein Eek, Jaime Hayon, Thomas Heatherwick, Javier Mariscal and Patricia Urquiola, are featured. In-depth interviews with twelve key designers explore pivotal projects and approaches to design. Web addresses of designers and manufacturers are given for every object, along with full captions and colour illustrations, making every design easy to source. This book introduces intelligent manufacturing system planning, design, and implementation, through the deep integration of the Internet, big data, artificial intelligence, and manufacturing process, to promote the transformation and upgrading of enterprises. This book shows the implementation of intelligent manufacturing process with 12 benchmarking enterprises, discusses the planning, implementation, and control of intelligent manufacturing system technology and method of theory, and analyzes the five hierarchies of intelligent manufacturing system, the five stages of life cycle, and five kinds of intelligent depth. The content can cultivate the reader's vocational ability to develop intelligent solutions and implementation based on complex, uncertain environment needs. This book will be interesting and useful to a wide readership in the various fields of management, information science, and engineering science. This document brings together a set of latest data points and publicly available information relevant for Technology Industry.
