*Surviving the Ride* Apr 09 2022 Mine-protected and mine-resistant, ambush-protected (MRAP) vehicles are today standard in the US, most major western armed forces and many other armies as a result of the wars in Iraq and Afghanistan. The South African Army was already routinely using mine-protected armored personnel carriers and patrol vehicles forty years ago even if they looked primitive and ungainly. A few years later, the South African Army had reached the stage where it could deploy entire combat groups into battle zones equipped with only mine-protected vehicles, including their ambulances and supply trucks. By then the mine-protected vehicles had also become effective for use in combat, rather than just protected transport, the Casspir being the chief example. More to the point, they saved countless soldiers and policemen from death or serious injury, and the basic concepts now live on in the various MRAP types in service today. The valuable lessons learned by the South Africans with their early designs of these combat-proven vehicles has led the country to become one of the global leaders in the design of MRAPs which are locally manufactured and exported around the world. *Surviving the Ride* is a fascinating pictorial account featuring more than 120 of these unique South African-developed vehicles, spanning a forty-year period, with over 280 photographs, many of which are previously unpublished.

Special Branch War Feb 24 2021 This searing account primarily covers Ed Bird's Special Branch (SB) service in the Beitbridge area of southern Matabeleland, 1976-1980, encompassing Operations Repulse and Tangent of the bitter Rhodesian 'bush war'. Joining the British South Africa Police (BSAP) in 1964, Bird cut his teeth on Selous Scouts 'pseudo' operations during Operation Hurricane in 1974-1976, so was well equipped to deal with the insidious escalation of the ZANLA and ZIPRA campaigns in the south of the country. A meticulous recorder, Bird implemented and maintained the

Beitbridge SB incident log, and it is this diary of terror and death upon which Bird's account hangs, interspersed with detailed accounts of fire fights, ambushes, landmine blasts, ZANLA executions, traitors and assassinations, SB 'dirty tricks' and 'turning' terrorists. Although first and foremost an intelligence-gatherer, Bird thrived on combat and against all protocol inveigled his way onto Fire Force operations and as an air mobile MAG machine-gunner on converted Police Reserve Air Wing aircraft. Decorated for bravery but overlooked for promotion, Bird's BSAP career became victim to spurious political expedience.

A Compendium of Armaments and Military Hardware (Routledge Revivals)

Jan 18 2023 First published in 1987, *The Compendium of Armaments and Military Hardware* provides, within a single volume, the salient technical and operational details of the most important weapons. The complete range of hardware used in land, sea and air forces throughout the world at the time of publication is covered, from tanks to rocket systems, helicopters to cruise missiles, alongside full details of size, weight and operational range. The book's main strength lies in the detail it gives of armament and associated ammunition capabilities, and of the sensors and other electronics required for the weapons to be used effectively. A key title amongst Routledge reference reissues, Christopher Chant's important work will be of great value to students and professionals requiring a comprehensive and accessible reference guide, as well as to weapons 'buffs'.
