Advanced Pre-Med  
Studies Course  
Description  
Semester 1: From  
surgery to vaccines,  
man has made  
great strides in the  
field of medicine.  
Quality of life has  
improved  
dramatically in the  
last few decades  
alone, and the  
future is bright. But  
students must not  
forget that God  
provided humans  
with minds and  
resources to bring  
about these  
advances. A biblical  
perspective of

healing and the use  
of medicine  
provides the best  
foundation for  
treating diseases  
and injury. In  
Exploring the  
History of  
Medicine, author  
John Hudson Tiner  
reveals the  
spectacular  
discoveries that  
started with men  
and women who  
used their abilities  
to better mankind  
and give glory to  
God. The  
fascinating history  
of medicine comes  
alive in this book,  
providing students  
with a healthy dose  
of facts, mini-  
biographies, and  
vintage  
illustrations. It  
seems that a new  
and more terrible  
disease is touted on  
the news almost  
daily. The spread of  
these scary

diseases from bird  
flu to SARS to AIDS  
is a cause for  
concern and leads  
to questions such  
as: Where did all  
these germs come  
from, and how do  
they fit into a  
biblical world view?  
What kind of  
function did these  
microbes have  
before the Fall?  
Does antibiotic  
resistance in  
bacteria prove  
evolution? How can  
something so small  
have such a huge,  
deadly impact on  
the world around  
us? Professor Alan  
Gillen sheds light  
on these and many  
other questions in  
The Genesis of  
Germs. He shows  
how these  
constantly mutating  
diseases are proof  
for devolution  
rather than  
evolution and how

all of these germs fit into a biblical world view. Dr. Gillen shows how germs are symptomatic of the literal Fall and Curse of creation as a result of man's sin and the hope we have in the coming of Jesus Christ. Semester 2: Body by Design defines the basic anatomy and physiology in each of 11 body systems from a creationist viewpoint. Every chapter explores the wonder, beauty, and creation of the human body, giving evidence for creation, while exposing faulty evolutionist reasoning. Special explorations into each body system look closely at disease aspects, current events, and

discoveries, while profiling the classic and contemporary scientists and physicians who have made remarkable breakthroughs in studies of the different areas of the human body. Within Building Blocks in Life Science you will discover exceptional insights and clarity to patterns of order in living things, including the promise of healing and new birth in Christ. Study numerous ways to refute the evolutionary worldview that life simply evolved by chance over millions of years. The evolutionary worldview can be found filtered through every topic

at every age-level in our society. It has become the overwhelmingly accepted paradigm for the origins of life as taught in all secular institutions. This dynamic education resource helps young people not only learn science from a biblical perspective, but also helps them know how to defend their faith in the process. 1 to 10 Number Tracing Worksheets For Kids (30 Pages).
