Investment Opportunities in Indonesia 7th Edition Aug 20 2022 The Macroeconomic Condition in Indonesia entered a quite challenging period in the tumultuous political year. The consumer sector, which has been moving negatively, has become one of the choices ahead of the State Budget Allocation which focuses on village subsidies and funds, and the momentum of the 2019 Presidential Election. In the 4-year report of the Governance Period of President Joko Widodo and Vice President Jusuf Kalla, the ease of business brought Indonesia as a worthy country of investment. Since 2017, Indonesia has been categorized as a country with a worthy investment rating by three leading international rating agencies (Moody 's, Fitch, and Standard & Poor 's). The status is an indication that Indonesia is trusted by international investors. In line with ease of business, Indonesia 's Ease of Doing Business (EoDB) ranking also continues to soar, which was 72nd in 2017. The surge shows a continuous structural improvement. The Center for Indonesian Investment Data Information (PIDII), as a government partner in the investment development efforts, participates to make efforts on investment promotional activities both via the Internet and publishing a book. Data or information we provide through the media is expected to add to the information required by investors. We extend our appreciation and gratitude to the Regional Governments for the participation and trust that has been given to us, as well as our countless thanks to various stakeholders who have helped and supported the realization of the book publishing activity. We hope that the book entitled the " Investment Opportunities in Indonesia " 7 th edition will benefit to all of us, especially in increasing investment growth in Indonesia and the national economy. The children are told that some cherries (their favourite noodles or cherries) are hidden somewhere in the bowl, and that serves as an incentive for drinking the soup. In joint families, by the time the children are old enough to know the trick played by their grandma, there is usually another group of kids ready to fall for it! They excite the kids, but the real nutrition lies not in the noodles but in the soup. The problems given in this book are like those noodles/cherries while solving all these problems are nutritious soup. Now it is your choice to drink the nutritious soups or not!!!
