**Current Catalog** Nov 25 2020 First multi-year cumulation covers six years: 1965-70.  
Affect Regulation Training Aug 23 2020 Emotion Regulation is currently one of the most popular topics in clinical psychology. Numerous studies demonstrate that deficits in emotion regulation skills are likely to help maintain various forms of psychological disorders. Thus, enhancing emotion regulation has become a major target in psychotherapeutic treatments. For this purpose, a number of therapeutic strategies have been developed and shown to be effective. However, for practitioners it is often difficult to decide

which of these strategies they should use or how they can effectively combine empirically-validated strategies. Thus, the authors developed the Affect Regulation Training as a transdiagnostic intervention which systematically integrates strategies from cognitive behavior therapy, mindfulness-based interventions, emotion-focused therapy, and dialectical behavioral therapy. The effectiveness of ART has been demonstrated in several high-quality studies.

**Piano, the Instrument** Feb 26 2021 Referencing literature on every aspect of the piano, this annotated bibliography will cut down on research time for scholars and students, directing them to the most relevant and useful sources.

*Great Tube Amps and Guitar Mods.* Jun 13 2022  
*CT Teaching Manual* Nov 18 2022 Ideal for radiology residents and technologists, the third

edition of this concise teaching manual is the perfect introduction to performing and interpreting CT scans. Designed as a systematic learning tool, CT Teaching Manual provides clear instructions for the use of computed tomography for all organs and includes information on positioning, the use of contrast media, multi-slice scanning, CT angiography, and dose reduction. It features representative CT scans of normal and pathological findings, explanatory drawings with keyed anatomic structures, as well as an overview of the most important measurement data. Self-assessment quizzes and answers at the end of each chapter help the reader monitor progress and evaluate knowledge gained. This edition also includes 64-slice technology with sagittal and coronal MRP reconstructions, and dual-source CT.

**Energy Manual** Sep 23 2020 While the efficiency and sustainability offensive is in full swing in most sectors of the economy, in the construction sector it is still in its very beginnings - economically as well as ecologically. However, politicians and policymakers at the global, European, and national levels have begun to address this deficit and are seeking to correct it with legal requirements and laws like EnEV, building certifications, and competitions. Following the proven model of earlier manuals in the series,

the Energy Manual presents a comprehensive look at the constructional parameters of energy efficiency and sustainability. It offers an advance look at the legal regulations being planned by the EU, and – as a tool ready for immediate use by architects, engineers, and designers in their daily work – it points the way toward the efficient and sustainable construction and operation of buildings. With its focus on the entire lifecycle of a building, it provides an integrated perspective – a necessary prerequisite for sustainable economic management.

Action Regulating covers the regulating requirements for the BTEC Advanced Diploma in Piano Action Regulating that was first taught at the Royal National College.

*Prisoners of War and Local Women in Europe and the United States, 1914-1956* Feb 15 2020

This book brings together historians from Great Britain, the United States, Germany, France, Canada, Austria, and Latvia who have worked and published on fraternisation between Prisoners of War and local women during either the First or Second World War, providing the first comparative study of this multi-faceted phenomenon in different belligerent countries. By focusing on prisoners as wartime migrants and studying the nature and impact of their interactions with the local female population, this book expands the existing framework on prisoner of war studies. Its substantial scope and comparative approach make it an important point of reference in the growing research field of POW studies.

## **Object Design Style Guide** Dec 15 2019

“Demystifies object-oriented programming, and lays out how to use it to design truly secure and performant applications.” —Charles Soetan, Plum.io Key Features Dozens of techniques for writing object-oriented code that’s easy to read, reuse, and maintain Write code that other programmers will instantly understand Design rules for constructing objects, changing and exposing state, and more Examples written in an instantly familiar pseudocode that’s easy to apply to Java, Python, C#, and any object-oriented language Purchase of the print book includes a free eBook in PDF, Kindle, and ePub formats from Manning Publications. About The Book Well-written object-oriented code is easy to read, modify, and debug. Elevate your coding style by mastering the universal best practices for object design presented in this book. These clearly presented rules, which apply to any OO language, maximize the clarity and durability of your codebase and increase productivity for you

and your team. In Object Design Style Guide, veteran developer Matthias Noback lays out design rules for constructing objects, defining methods, and much more. All examples use instantly familiar pseudocode, so you can follow along in the language you prefer. You’ll go case by case through important scenarios and challenges for object design and then walk through a simple web application that demonstrates how different types of objects can work together effectively. What You Will Learn Universal design rules for a wide range of objects Best practices for testing objects A catalog of common object types Changing and exposing state Test your object design skills with exercises This Book Is Written For For readers familiar with an object-oriented language and basic application architecture. About the Author Matthias Noback is a professional web developer with nearly two decades of experience. He runs his own web development, training, and consultancy company called “Noback’s Office.”

Table of Contents: 1 | Programming with objects: A primer 2 | Creating services 3 | Creating other objects 4 | Manipulating objects 5 | Using objects 6 | Retrieving information 7 | Performing tasks 8 | Dividing responsibilities 9 | Changing the behavior of services 10 | A field guide to objects 11 | Epilogue

The Raven King May 20 2020 Recounts the true story of Matthias Corvinus, the "Raven King," who sought to build the greatest library in Christendom in the fifteenth century, only to have it plundered by the Ottoman Empire after his death, and examines how Hungary's royal family has tried to restore the contents of the library.

**History Through the Opera Glass** Mar 10 2022 (Limelight). This first-of-its-kind, highly entertaining, and carefully researched account reveals how nearly 200 operas by leading composers and librettists have portrayed the major events and personalities of more than 2000 years of history. In a continuous and absorbing narrative, the book sweeps from Roman times to 1820, with a cast of characters that includes Julius Caesar, Antony and Cleopatra, Attila, Charlemagne, Henry VIII, Elizabeth I, Catherine the Great, Napoleon and hundreds more. All are seen as the figures historians generally perceive them to have been

and as their on-stage counterparts, created and re-imagined by some of opera's greatest artists.
