Multimedia Services in Intelligent Environments Nov 25 2020 Multimedia services are now commonly used in various activities in the daily lives of humans. Related application areas include services that allow access to large depositories of information, digital libraries, e-learning and e-education, e-government and e-governance, e-commerce and e-auctions, e-entertainment, e-health and e-medicine, and e-legal services, as well as their mobile counterparts (i.e., m-services). Despite the tremendous growth of multimedia services over the recent years, there is an increasing demand for their further development. This demand is driven by the ever-increasing desire of society for easy accessibility to information in friendly, personalized and adaptive environments. In this book at hand, we examine recent Advances in Recommender Systems. Recommender systems are crucial in multimedia services, as they aim at protecting the service users from information overload. The book includes nine chapters, which present various recent research results in recommender systems. This research book is directed to professors, researchers, application engineers and students of all disciplines who are interested in learning more about recommender systems, advancing the corresponding state of the art and developing recommender systems for specific applications.

Delphi Complete Works of Aeschines (Illustrated) Jan 16 2020 An Athenian orator and statesman, Aeschines was the great rival of Demosthenes, being later ranked as one of the ten Attic orators. He advocated peace with Philip II of Macedonia, but was eventually defeated and discredited by Demosthenes. Aeschines then left Athens to set up a school of rhetoric at Rhodes. As a master of Greek oratory, Aeschines' speeches are regarded as second to only Demosthenes', serving as important documents for the study of Athenian diplomacy and politics. Delphi's Ancient Classics series provides eReaders with the wisdom of the Classical world, with both English translations and the original Greek texts. This comprehensive eBook presents Aeschines' complete extant works, with illustrations, informative introductions and the usual Delphi bonus material.

(Version 1) * Beautifully illustrated with images relating to Aeschines' life and works * Features the complete extant works of Aeschines, in both English translation and the original Greek * Informative introductions to the speeches * Includes C. D. Adams' translations, which previously appeared in the Loeb Classical Library * Also includes the original Loeb footnotes to aid your studies * Excellent formatting of the texts * Provides a special dual English and Greek text, allowing readers to compare the sections paragraph by paragraph — ideal for students * Features three bonus biographies, including the Pseudo-Plutarch account of the orator's life — discover Aeschines' ancient world Please visit www.delphiclassics.com to explore our range of Ancient Classics titles or buy the entire series as a Super Set CONTENTS: The Translations The Speech against Timarchus The Speech on the Embassy The Speech against Ctesiphon The Greek Texts List of Greek Texts The Dual Texts Dual Greek and English Texts The Biographies Demosthenes by Plutarch Aeschines by Pseudo-Plutarch The Life of Aeschines by C. Reflections Honoring Sarah W. Whiteside Jun 20 2020 It has been said that a good teacher is like a candle in that she consumes herself in order to light the way for students. Since she arrived at The Altamont School in the fall of 1978, Mrs. Whiteside's love for Latin, Greek, and all things Classical, has been all-consuming and contagious. 40 years. Thousands of students. How do you begin to measure a legacy? We hope that these remembrances, stories, and memories will begin that process.

ACCT3 Management Jul 02 2021 ACCT3 Management is the Asia-Pacific edition of the proven 4LTR press approach to management accounting, designed to enhance students' learning experiences. The text is for teaching students learning the preparers/debits and credits approach and is presented in an easy-to-read and accessible style. This third edition includes a strong suite of student and instructor resources that enhance student learning and revision. Leveraging Applications of Formal Methods, Verification and Validation. Specialized Techniques and Applications Apr 30 2021 The two-volume set LNCS 8802 and LNCS 8803 constitutes the refereed proceedings of the 6th International Symposium on Leveraging Applications of Formal Methods, Verification and Validation, ISoLA 2014, held in Imperial, Corfu, Greece, in October 2014. The total of 67 full papers was carefully reviewed and selected for inclusion in the proceedings. Featuring a track introduction to each section, the papers are organized in topical sections named: evolving critical systems; rigorous engineering of autonomic ensembles; automata learning; formal methods and analysis in software product line engineering; model-based code generators and compilers; engineering virtualized systems; statistical model checking; risk-based testing; medical cyber-physical systems; scientific workflows; evaluation and reproducibility of program analysis; processes and data integration in the networked healthcare; semantic heterogeneity in the formal development of complex systems. In addition, part I contains a tutorial on automata learning in practice; as well as the preliminary manifesto to the LNCS Transactions on the Foundations for Mastering Change with several position papers. Part II contains information on the industrial track and the doctoral symposium and poster session.

Religious Zionism, Jewish Law, and the Morality of War Oct 17 2022 "This study is a pioneering exploration of how rabbis in the religious Zionist community in Israel constructed a body of Jewish law on war. It focuses on five leading rabbis in this camp and how they dealt with a number of key moral issues that the waging of modern war raised"--

The Ten-Minute Inservice Feb 09 2022 Quick, easy, specific steps that make a difference in teaching and learning Busy school leaders need an easy-to-apply resource to increase teacher effectiveness quickly and efficiently. This book shows principals and staff developers how to improve teaching school-wide through high-impact inservices lasting only ten minutes—incorporated easily into weekly staff meetings. Written by popular education consultants Todd Whitaker and Annette Breaux, this important book offers 40 teacher-tested, mini-workshops that can improve teaching in every classroom. The book covers a range of topics, from behavior challenges and parent engagement to motivating students and making lessons meaningful. Offers school leaders a proven plan to help every teacher improve on a weekly basis by conducting simple 10-minute inservice workshops Offers staff developers, new teacher induction coordinators, mentors, and Professional Learning Communities ideas for effective training sessions Each of the 40 mini-training sessions offered include tips on how to introduce the topic, sample scripts to follow, and implementation activities to ensure lasting learning Whitaker and Breaux are bestselling education authors with a proven track record improving teacher effectiveness This handy resource contains a simple and effective method for improving teacher effectiveness school wide.

The Business Year: Oman 2021/22 May 20 2020 Oman, for some time, has been a nation on the move. An integral part of the GCC, it is also seeking to extend its influence further afield via the development of port infrastructure that is set to make it a firm fixture on the East-West transport route. But Oman isn't developing unguided, instead sticking faithfully to Vision 2040, a wide-ranging, ambitious blueprint that foresees the development of a diverse, sustainable economy unshackled by a reliance on oil and gas, which currently plagues much of the region. In this edition, which features interviews with top business leaders from across the economy, as well as news and analysis, we cover: diplomacy, finance, Vision 2040, 4th Industrial Revolution, digital innovation, sustainability, logistics, real estate, agribusiness, and tourism and retail.

Large Scale Optimization in Supply Chains and Smart Manufacturing Nov 06 2021 In this book, theory of large scale optimization is introduced with case studies of real-world problems and applications of structured mathematical modeling. The large scale optimization methods are represented by various theories such as Benders' decomposition, logic-based Benders' decomposition, Lagrangian relaxation, Dantzig-Wolfe decomposition, multi-tree decomposition, Van Roy' cross decomposition and parallel decomposition for mathematical programs such as mixed integer nonlinear programming and stochastic programming. Case studies of large scale optimization in supply chain management, smart manufacturing, and Industry 4.0 are investigated with efficient implementation for real-time solutions. The features of case studies cover a wide range of fields including the Internet of things, advanced transportation systems, energy management, supply chain networks, service systems, operations management, risk management, and financial and sales management. Instructors, graduate students, researchers, and practitioners, would benefit from this book finding the applicability of large scale optimization in asynchronous parallel optimization, real-time distributed network, and optimizing the knowledge-based expert system for convex and non-convex problems.
