In this first synthetic, comprehensive survey of Japanese sports in English, the authors are attentive to the complex and fascinating interaction of traditional and modern elements. In the course of tracing the emergence and

development of sumo, the martial arts, and other traditional sports from their origins to the present, they demonstrate that some cherished "ancient" traditions were, in fact, invented less than a century ago. They also register their skepticism about the use of the samurai tradition to explain Japan's success in sports. Special attention is given to Meiji-era Japan's frequently ambivalent adoption and adaptation of European and American sports--a particularly telling example of Japan's love-hate relationship with the West. The book goes on to describe the history of physical education in the school system, the emergence

of amateur and professional leagues, the involvement of business and the media in sports promotion, and Japan's participation in the Olympics. Operations Management is an undergraduate text at universities and universities of technology that focusses on the managerial practices required in the manufacturing of products and provision of services. This study is an

introduction to the momentous events of the Russian Revolution in 1917 with an analysis of the reasons behind the characteristic polarization of opinions concerning this momentous political event and why for some it is a milestone of human progress and for others, a catastrophic chapter in government oppression. A comprehensive text for undergraduate-level biology courses that covers cells, genetics, mechanisms and evolution, biological diversity, plant and animal forms and functions, and ecology; and includes review questions, activities, figures, chapter summaries, and a CD-ROM which provides access to online

materials. At the end of the 19th century, a group of young Glasgow-based painters established an international reputation for realism and plein-air landscape painting. Led by James Guthrie, John Lavery, Arthur Melville, George Henry, and E. A. Hornel, the Glasgow Boys, as they came to be known, shared an enthusiasm for strong, fresh colors, naturalistic subject matter, and a willingness to travel outside Scotland for subjects and settings. Their enthusiasm for naturalism was equaled only by their dislike of the Scottish arts establishment. In this widely acclaimed book, Roger Billcliffe describes not only the work of the individual

artists but also their rejection by local collectors and officialdom before European success caused their work to become much in demand. First published 20 years ago, the book rekindled interest in the group and their work. Now redesigned with more than 200 illustrations in color, it introduces the collective to a new generation of readers and collectors. This is a great value multipack consisting of Slack: Operations Management 3/e ISBN: 0273646575 & Johnson/Harrison: Cases in Operations Management 3/e ISBN: 0273655310 Based on archival research, personal letters, interviews, and previously secret files, the

author presents a comprehensive biography of the life of Joseph Stalin. The second edition of this guide to Poland has been updated to take account of the years from 1989–2005. This period marked its liberation from the Soviet Union, the birth of Poland's 'Third Republic' and, recently, its accession to the European Union in 2004. Poland's history has been marked by its resilience. Once a dominant force in central and eastern Europe and home to a remarkable experiment in consensual politics, it was excised from the map by its neighbours in 1795. Resurrected in 1918, partitioned afresh during the

Second World War, it survived to become a satellite of the Soviet Union. Yet in the 1980s, it was Poland which blazed the trail in casting off communism, and was finally able to reassert its Christian heritage. With its updated bibliography and new chronology, the book is the ideal companion for all looking for a comprehensive survey of this fascinating country. This book focuses on partitional clustering algorithms, which are commonly used in engineering and computer scientific applications. The goal of this volume is to summarize the state-of-the-art in partitional clustering. The book includes such topics as center-based clustering, competitive

learning clustering and density-based clustering. Each chapter is contributed by a leading expert in the field. Among the personalities included in the volume are Cambridge scholar Carmen Blacker, historians Arnold Toynbee and William Beasley, British military observer and The Times reporter of the Russo-Japanese War General Sir Ian Hamilton, philosopher Bertrand Russell, playwright and orator George Bernard Shaw, the Choshu students Inoue Kaoru and Yamao Yozo who were later key figures in the modernization of Japan, and Walter Dening --- scholar and missionary. Themes treated include the history of horse racing in

Japan, the Japanese influence on British architects, the beginnings of golf in Japan and Japanese gardeners in Britain. -  
-Book Jacket. This book documents developments in the countries of eastern Europe, including the rise of authoritarian tendencies in Russia and Belarus, as well as the victory of the democratic 'Orange Revolution' in Ukraine, and poses important questions about the origins of the East Slavic nations and the essential similarities or differences between their cultures. It traces the origins of the modern Russian, Ukrainian and Belarusian nations by focusing on pre-modern forms of group identity among the Eastern

Slavs. It also challenges attempts to 'nationalize' the Rus' past on behalf of existing national projects, laying the groundwork for understanding of the pre-modern history of Russia, Ukraine and Belarus. The book covers the period from the Christianization of Kyivan Rus' in the tenth century to the reign of Peter I and his eighteenth-century successors, by which time the idea of nationalism had begun to influence the thinking of East Slavic elites. A bold new accounting of the great social and political upheavals that enveloped Europe between 1914 and 1945—from the Russian Revolution through the Second World War. In Lenin,

Stalin, and Hitler, acclaimed historian Robert Gellately focuses on the dominant powers of the time, the Soviet Union and Nazi Germany, but also analyzes the catastrophe of those years in an effort to uncover its political and ideological nature. Arguing that the tragedies endured by Europe were inextricably linked through the dictatorships of Lenin, Stalin, and Hitler, Gellately explains how the pursuit of their “utopian” ideals turned into dystopian nightmares. Dismantling the myth of Lenin as a relatively benevolent precursor to Hitler and Stalin and contrasting the divergent ways that Hitler and Stalin

achieved their calamitous goals, Gellately creates in Lenin, Stalin, and Hitler a vital analysis of a critical period in modern history. The first volume of an encompassing study of the problem of Reformation and Scholasticism in philosophy, based on Greek philosophy up to and including Plato. Traces the medieval fur trade which stretched from western Europe to China. Rugby union has undergone immense change in the past two decades - introducing a World Cup, accepting professionalism and creating a global market in players - yet no authoritative English-language general history of the game has been published in

that time. Until now. A Game for Hooligans brings the game's colourful story up to date to include the 2007 World Cup. It covers all of the great matches, teams and players but also explores the social, political and economic changes that have affected the course of rugby's development. It is an international history, covering not only Britain and France but also the great rugby powers of the southern hemisphere and other successful rugby nations, including Argentina, Fiji and Japan. Contained within are the answers to many intriguing questions concerning the game, such as why 1895 is the most important date in both rugby-union and rugby-league

history and how New Zealand became so good and have remained so good for so long. There is also a wealth of anecdotes, including allegations of devil-worship at a Welsh rugby club and an account of the game's contribution to the Cuban Revolution. This is a must-read for any fan of the oval ball. Dotyczy m. in. Kresów wschodnich Rzeczypospolitej. Johannesburg: The Elusive Metropolis is a pioneering effort to insert South Africa's largest city into urban theory, on its own terms. Johannesburg is Africa's premier metropolis. Yet theories of urbanization have cast it as an emblem of irresolvable crisis, the spatial

embodiment of unequal economic relations and segregationist policies, and a city that responds to but does not contribute to modernity on the global scale. Complicating and contesting such characterizations, the contributors to this collection reassess classic theories of metropolitan modernity as they explore the experience of “city-ness” and urban life in post-apartheid South Africa. They portray Johannesburg as a polycentric and international city with a hybrid history that continually permeates the present. Turning its back on rigid rationalities of planning and racial separation, Johannesburg has become a

place of intermingling and improvisation, a city that is fast developing its own brand of cosmopolitan culture. The volume’s essays include an investigation of representation and self-stylization in the city, an ethnographic examination of friction zones and practices of social reproduction in inner-city Johannesburg, and a discussion of the economic and literary relationship between Johannesburg and Maputo, Mozambique’s capital. One contributor considers how Johannesburg’s cosmopolitan sociability enabled the anticolonial projects of Mohandas Ghandi and Nelson Mandela. Journalists, artists, architects, writers, and

scholars bring contemporary Johannesburg to life in ten short pieces, including reflections on music and megamalls, nightlife, built spaces, and life for foreigners in the city. During the nineteenth century, railway lines spread rapidly across Europe, linking the continent in ways unimaginable to previous generations. By the beginning of the twentieth century the great cities of the continent were linked by a complex and extensive rail network. Yet this

high-point of interconnectivity, was abruptly cut-off after 1945, as the Cold War built barriers - both physical and ideological - between east and west. In this volume, leading transport history scholars take a fresh look at this situation, and the ramifications it had for Europe. As well as addressing the parallel development of railways either side of the Iron Curtain, the book looks at how transport links have been reconnected and reconfigured in the twenty years since the reunification of Europe. In particular, it focuses upon the former communist countries and how they have responded to the challenges and opportunities railways offer

both nationally and internationally. Including contributions from historians, researchers, policy makers, representatives of railway companies and railway museum staff, the essays in this collection touch upon a rich range of subjects. Divided into four sections: 'The Historical Overview', 'Under Russian Protection', 'After the Fall of the Iron Curtain', and 'The Heritage of Railways in Eastern Europe' the volume offers a broadly chronological introduction to the issue, that provides both a snap-shot of current debates and a starting point for further research. It concludes that in an era of increased globalisation and

interconnectivity - and despite the rise of air and road transport and virtual methods of communication - railways still have a crucial role to play in the development of a prosperous and connected Europe. History. Richard Pipes's authoritative history of the "violent and disruptive acts" that created the first modern totalitarian regime portrays the crisis at the heart of the tsarist empire. Drawing on archival materials newly released in Russia, he chronicles the upheaval that began as a conservative revolt but was soon captured by messianic intellectuals intent not merely on reforming Russia but on remaking the world. He

provides fresh accounts of the revolution's personalities and policies, crises, and cruelties, from the murder of the royal family through civil war, famine, and state terror. Brilliantly and persuasively, Pipes shows us why the resulting system owes less to the theories of Marx than it did to the character of Lenin and Russia's long authoritarian tradition. What ensues is a path-clearing work that is indispensable to any understanding of the events of the century. Europe became a land of cities during the last millennium. The story told in this book begins with North Sea and Mediterranean traders sailing away from Dorestad and

Amalfi, and with warrior kings building castles to fortify their conquests. It tells of the dynamism of textile towns in Flanders and Ireland. While London and Hamburg flourished by reaching out to the world and once vibrant Spanish cities slid into somnolence, a Russian urban network slowly grew to rival that of the West. Later as the tide of industrialization swept over Europe, the most intense urban striving and then settled back into the merchant cities and baroque capitals of an earlier era. By tracing the large-scale processes of social, economic, and political change within cities, as well as the evolving relationships between

town and country and between city and city, the authors present an original synthesis of European urbanization within a global context. They divide their study into three time periods, making the early modern era much more than a mere transition from preindustrial to industrial economies. Through both general analyzes and incisive case studies, Hohenberg and Lees show how cities originated and what conditioned their early development and later growth. How did urban activity respond to demographic and technological changes? Did the social consequences of urban life begin degradation or

inspire integration and cultural renewal? New analytical tools suggested by a systems view of urban relations yield a vivid dual picture of cities both as elements in a regional and national heirarchy of central places and also as junctions in a transnational network for the exchange of goods, information, and influence. A lucid text is supplemented by numerous maps, illustrations, figures, and tables, and by substantial bibliography. Both a general and a scholarly audience will find this book engrossing reading. From the author of *The Last Tsar*, the first full-scale life of Stalin to have what no previous biography has fully obtained: the facts. Granted privileged access to Russia's secret archives, Edvard Radzinsky paints a picture of the Soviet strongman as more calculating, ruthless, and blood-crazed than has ever been described or imagined. Stalin was a man for whom power was all, terror a useful weapon, and deceit a constant companion. As Radzinsky

narrates the high drama of Stalin's epic quest for domination-first within the Communist Party, then over the Soviet Union and the world-he uncovers the startling truth about this most enigmatic of historical figures. Only now, in the post-Soviet era, can what was suppressed be told: Stalin's long-denied involvement with terrorism as a young revolutionary; the crucial importance of his misunderstood, behind-the-scenes role during the October Revolution; his often hostile relationship with Lenin; the details of his organization of terror, culminating in the infamous show trials of the 1930s; his secret dealings with

Hitler, and how they backfired; and the horrifying plans he was making before his death to send the Soviet Union's Jews to concentration camps-tantamount to a potential second Holocaust. Radzinsky also takes an intimate look at Stalin's private life, marked by his turbulent relationship with his wife Nadezhda, and recreates the circumstances that led to her suicide. As he did in *The Last Tsar*, Radzinsky thrillingly brings the past to life. The Kremlin intrigues, the ceaseless round of double-dealing and back-stabbing, the private worlds of the Soviet Empire's ruling class-all become, in Radzinsky's hands, as gripping and powerful as the

great Russian sagas. And the riddle of that most cold-blooded of leaders, a man for whom nothing was sacred in his pursuit of absolute might--and perhaps the greatest mass murderer in Western history--is solved. 'The Scottish Nation, 1700-2007' examines the social, political, religious and economic factors that have shaped modern Scotland. Devine places Scotland firmly within an international context and provides a key focus for the ongoing debate regarding Scotland's future. The perfect way to prepare for exams, build problem-solving skills, and get the grade you want! For Chapters 1-22, this manual contains detailed solutions to

approximately 20% of the problems per chapter (indicated in the textbook with boxed problem numbers). The manual also features a skills section, important notes from key sections of the text, and a list of important equations and concepts. This book is a concise and comprehensive narrative history of Russia from 980 to 1584. It covers the history of the realm of the Rurikid dynasty from the reign of Vladimir 1 the Saint, through to the reign of Ivan the Terrible, who sealed the end of

his dynasty's rule. Presenting developments in social and economic areas, as well as in political history, foreign relations, religion and culture, Medieval Russia, 980-1584 breaks away from the traditional view of Old Russia as a static, immutable culture, and emphasises the 'dynamic' and changing qualities of Russian society. Janet Martin develops clear lines of argument that lead to conclusions concerning how and why the states and society of the lands of the Rus' assumed the forms and characteristics that they did. Broadly accessible with informative and provocative interpretations, this book

provides an up-to-date analysis of medieval Russia. Now in its third fully updated edition The Complete Book of the Commonwealth Games covers every result of every event of every sport in the Games history, from its inception in 1930 to the most recent edition in 2014. It is the ideal companion for following the 2018 Gold Coast Games in Australia. Global anxieties about catastrophic urban explosion, social fracture, environmental degradation, escalating crime and violence, and rampant

consumerism alongside grinding poverty, are projected onto this city as a microcosm of things to come. Decision-makers in cities worldwide have attempted to balance harsh fiscal and administrative realities with growing demands for political, economic and social justice. This book investigates pragmatic approaches to urban economic development, service delivery, spatial restructuring, environmental sustainability and institutional reform in Johannesburg. It explores the conditions and processes that are determining the city's transformation into a cosmopolitan metropole and magnet for the continent.

Detailing every Test match ever played by the top ten international teams (Argentina, Australia, England, France, Ireland, Italy, New Zealand, Scotland, South Africa and Wales) as well as histories and head-to-head statistics for the second and third tier international teams (Canada, Fiji, Georgia, Japan, Namibia, Romania, Russia, Samoa, Tonga, the United States of America and Uruguay), The Complete Rugby Union Compendium is the definitive source of statistical information on Test match rugby union. With over 5,700 entries presented in a visually engaging format, this book also features over 100 facts and

anecdotes from more than a century of rugby union and includes fascinating trivia on the Rugby World Cup, global stadia, trophies, tournaments and competitions. In this unique guide, Keith Young has created a veritable treasure trove for all rugby enthusiasts. Identity has become the watchword of our times. In sub-Saharan Africa, this certainly appears to be true and for particular reasons. Africa is urbanising rapidly, cross-border migration streams are swelling and globalising influences sweep across the continent. Africa is also facing up to the challenge of nurturing emergent democracies in which citizens

often feel torn between older traditional and newer national loyalties. Accordingly, collective identities are deeply coloured by recent urban as well as international experience and are squarely located within identity politics where reconciliation is required between state nation-building strategies and sub-national affiliations. They are also fundamentally shaped by the growing inequality and the poverty found on this continent. These themes are explored by an international set of scholars in two South African and two Francophone cities. The relative importance to urban residents of race, class and ethnicity but also of

work, space and language are compared in these cities. This volume also includes a chapter investigating the emergence of a continental African identity. A recent report of the Office of the South African President claims that a strong national identity is emerging among its citizens, and that race and ethnicity are waning whilst a class identity is in the ascendance. The evidence and analyses within this volume serve to gauge the extent to which such claims ring true, in what everyone knows is a much more complex and shifting terrain of shared meanings than can ever be captured by such generalisations. Essays by 46 historians reflect the impact

of the fall of the Soviet Union on the study of the revolution that birthed it, including better access to archives and new opportunities for collaborations between Russian and other specialists. They cover the revolution as event; actors and the question of agency; parties, movements, and ideologies; institutions and institutional cultures; social groups, identities, cultures, and the question of consciousness; economic issues and problems of everyday life; and nationality and regional questions. Annotation copyrighted by Book News, Inc., Portland, OR The sixth volume of The New Cambridge Medieval History covers the fourteenth century,

a period dominated by plague, other natural disasters and war which brought to an end three centuries of economic growth and cultural expansion in Christian Europe, but one which also saw important developments in government, religious and intellectual life, and new cultural and artistic patterns. Part I sets the scene by discussion of general themes in the theory and practice of government,

religion, social and economic history, and culture. Part II deals with the individual histories of the states of western Europe; Part III with that of the Church at the time of the Avignon papacy and the Great Schism; and Part IV with eastern and northern Europe, Byzantium and the early Ottomans, giving particular attention to the social and economic relations with westerners and those of other

civilisations in the Mediterranean. Philosophical reflection must begin with the analysis of concepts we use; for these provide the frame of reference and determine the direction our inquiry will take.-- Von Bertalanffy. Part history, part autobiography, Eksteins relates the tragic story of the Baltic nations before, during, and after World War II through personal stories from his family. Photos and map.
